Important Checklist Before Use

01 Recommended Browser

We highly recommend using Google Chrome.

Supported: Chrome, Edge, Safari, Firefox

💡 **Keep Chrome updated to the latest version for best results.**

02 Supported File Types

MS Word (.doc/.docx), Adobe PDF recommended

Others: TXT, Google Docs, PPTX, XLSX, etc.

⚠️ **HWP files have low compatibility; please convert them to Word or PDF before scanning.**

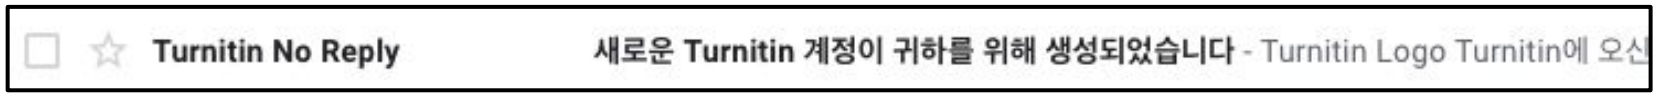

Creating an account

1. Request an account to the Turnitin admin at your school.

If you do not know the Turnitin admin of your institution, please contact Turnitin korea: koreasales@turnitin.com (Your school, department, role, name, and email address included)

2.

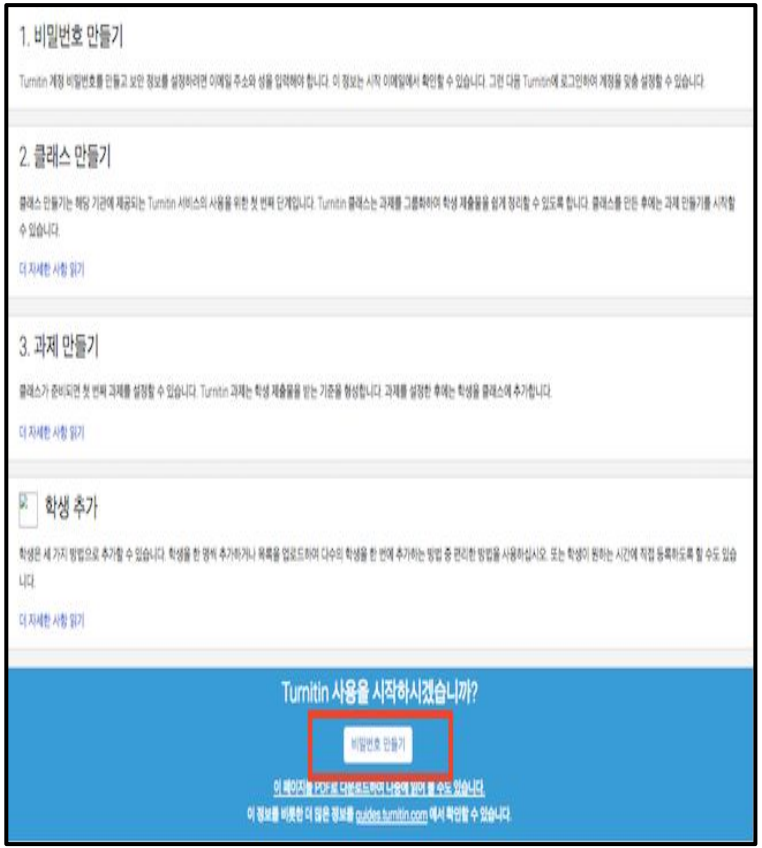

1) Open Welcome mail (sender: [Turnitin Noreply]), Click [시작하기]
2) Click [비밀번호 만들기] on a pop up screen
3) On [계정 설정] screen, Email address and Last name
4) Go back to your email inbox, Open [Turnitin 비밀번호 만들기], click [Turnitin 계정 설정을 완료하려면 여기를 클릭하여 비밀번호를 생성하십시오]

3. Note that the url link in the welcome mail is valid for 24 hours. If you happen to fail to activate the url and reset the password within that time frame, please send an email to the admin to put you in the system again.

Creating an account continued

Creating an account continued

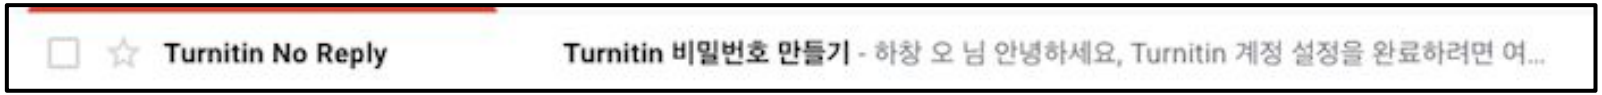

1. **Type in your Email address and your last name and click the [다음] button.**

Creating an account continued

2.Click the link in the email to change your password.

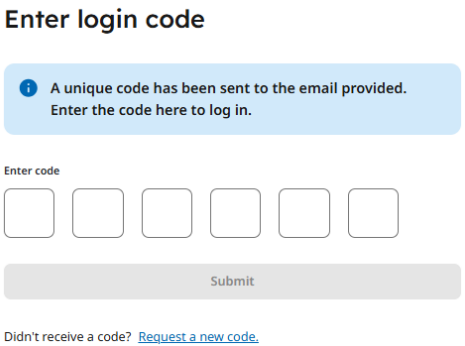

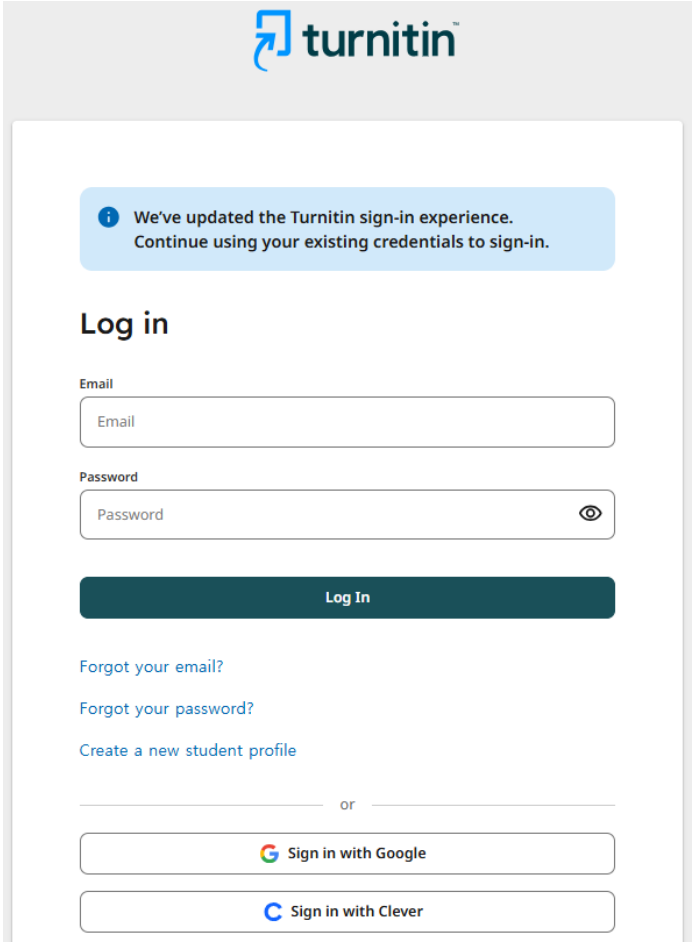

Login

**1. On the www.turnitin.com homepage,
click the [Log In] button in the top right**

**2. On the Turnitin login page, enter your email address and password,
and click the 'Log In' button.**

3. A unique code has been sent to the email provided. Access to the service is available only after the code has been entered.

Quick submit: Self-check for your paper

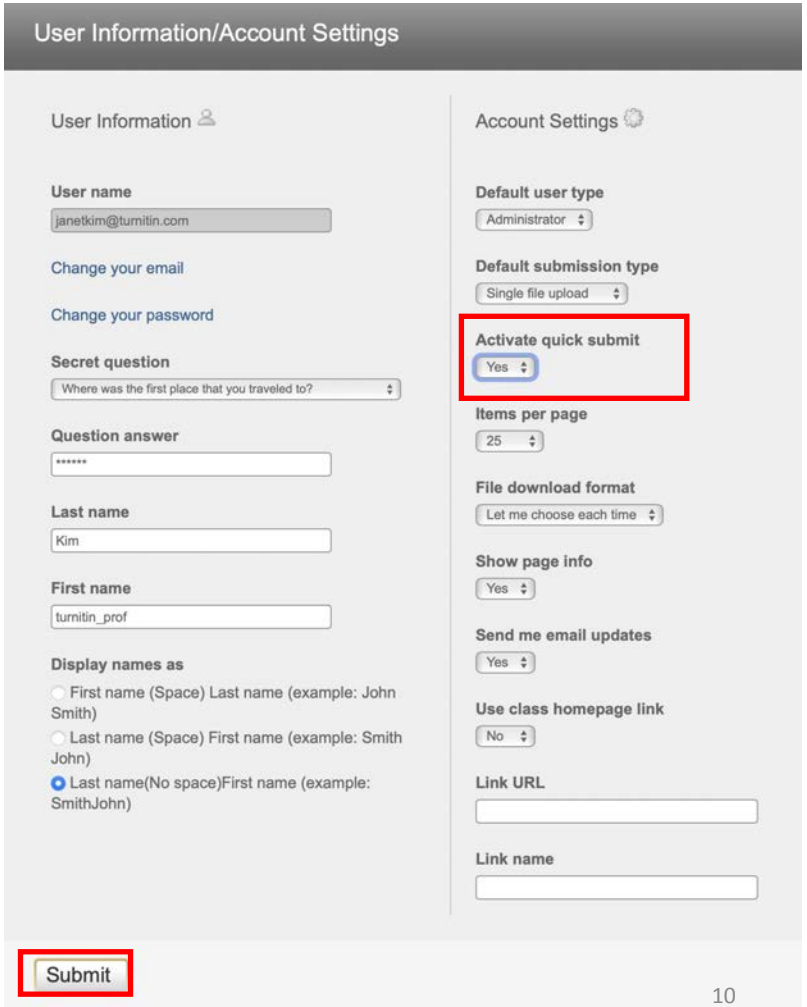

Click on your profile (name).

Quick submit

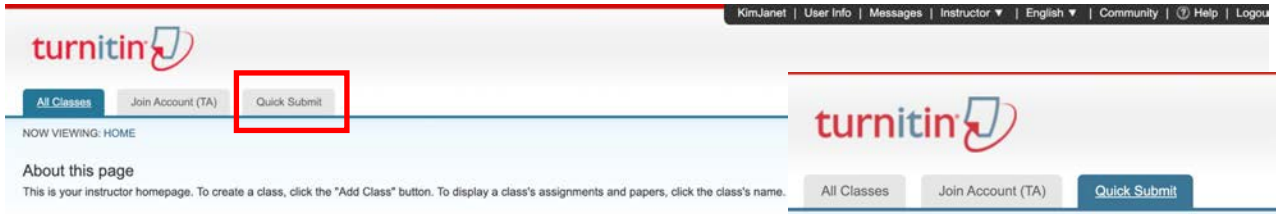

Select ‘Yes’ in the ‘Activate Quick Submit’ field and click the ‘Submit’ button at the bottom.

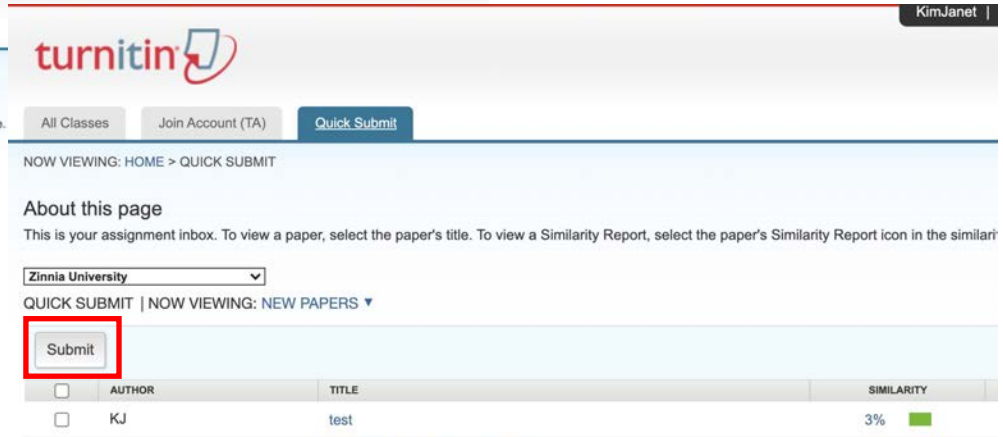

*If you want to upload multiple files at once instead of 'Single File Upload,' change it in ‘Default Submission Type’.

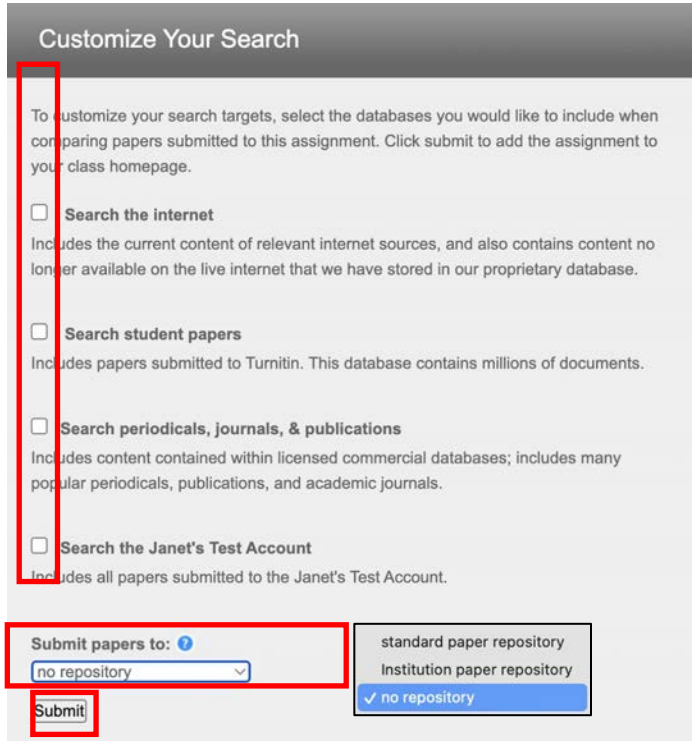

Quick submit

Once Quick Submit is enabled, you will see a 'Quick Submit' tab. Click the 'Submit' button below your school name.

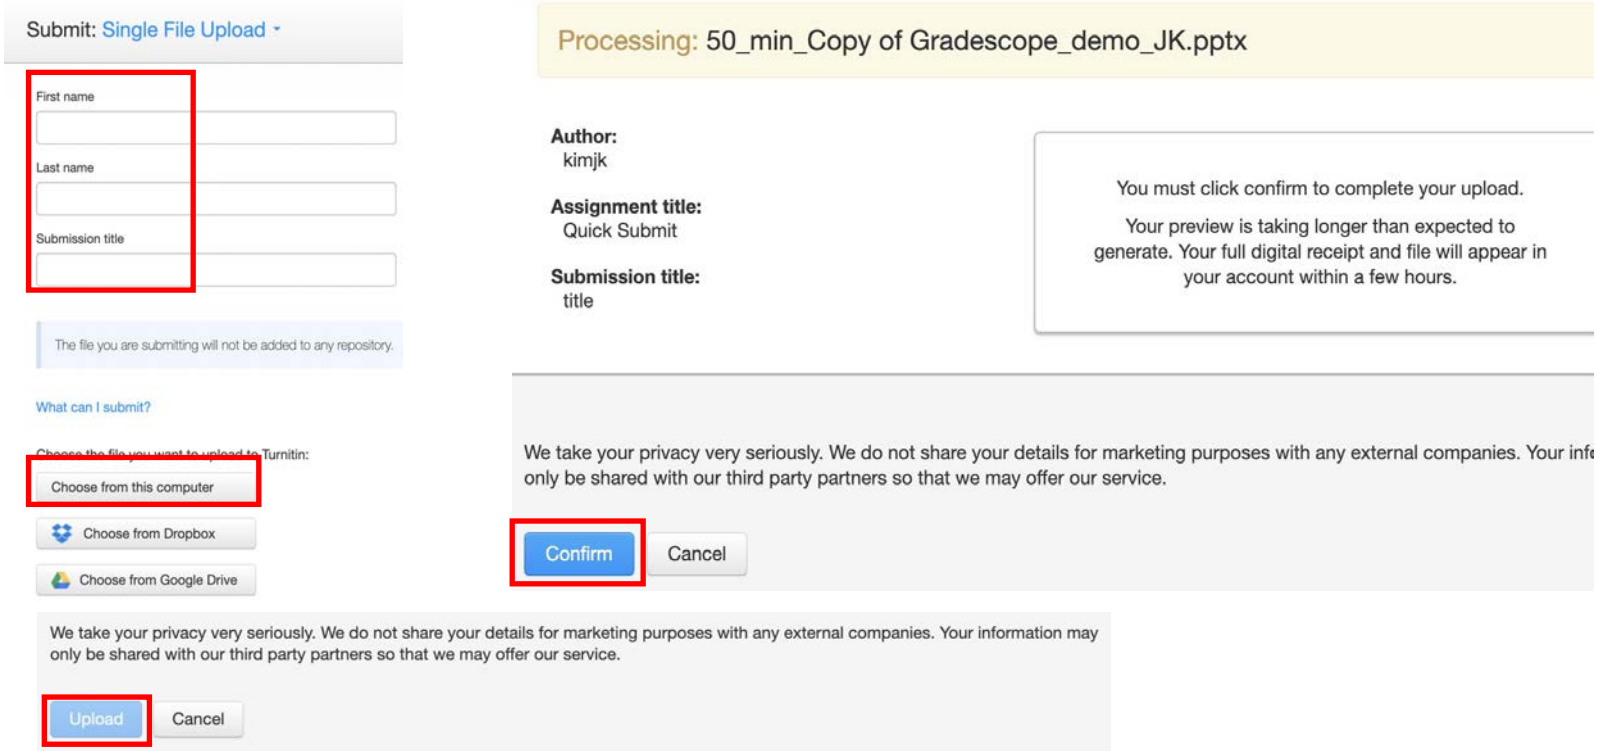

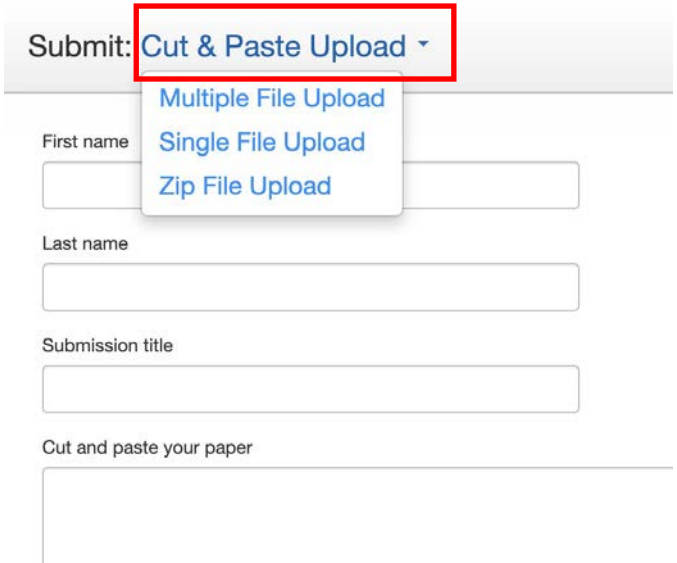

When you click the ‘Submit’ button, the ‘Customize Your Search’ settings will appear. Check (v) all search option boxes, **set the report submission target to ‘No repository,’** and then click the ‘Submit’ button. ((Otherwise, your paper will be saved in our databases and could affect your originality check results in the future.))

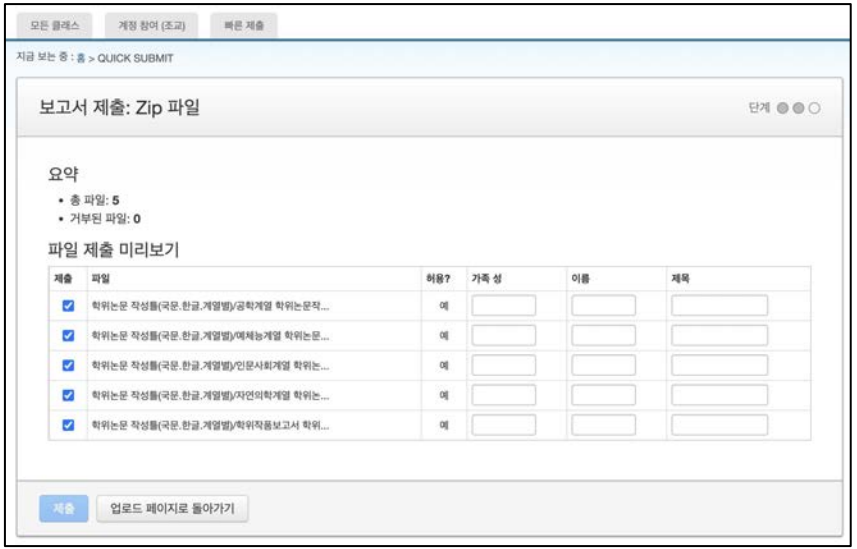

Fill in the information for file upload. Write your first name, last name, submission title, click ‘Choose from this computer’ to upload the file, and click ‘Upload.’ When the screen changes, check the paper content and click ‘Confirm.’

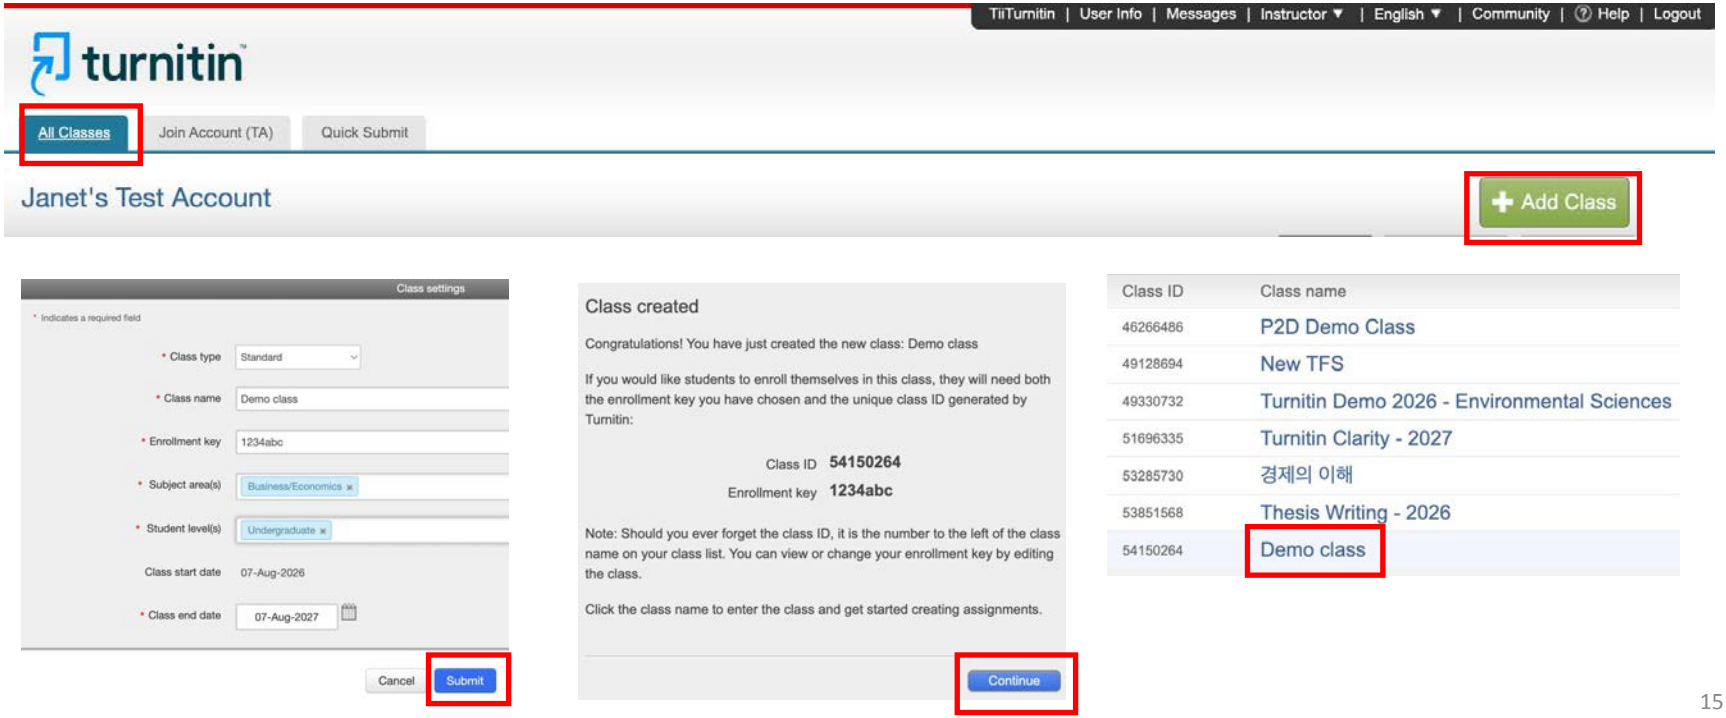

Other types of uploads are also available. Clicking [Single File Upload] will bring up a drop-down menu. When uploading multiple files, select [Multiple File Upload] or [Zip File Upload]. If you want to check text without a file, select [Cut and Paste Upload].

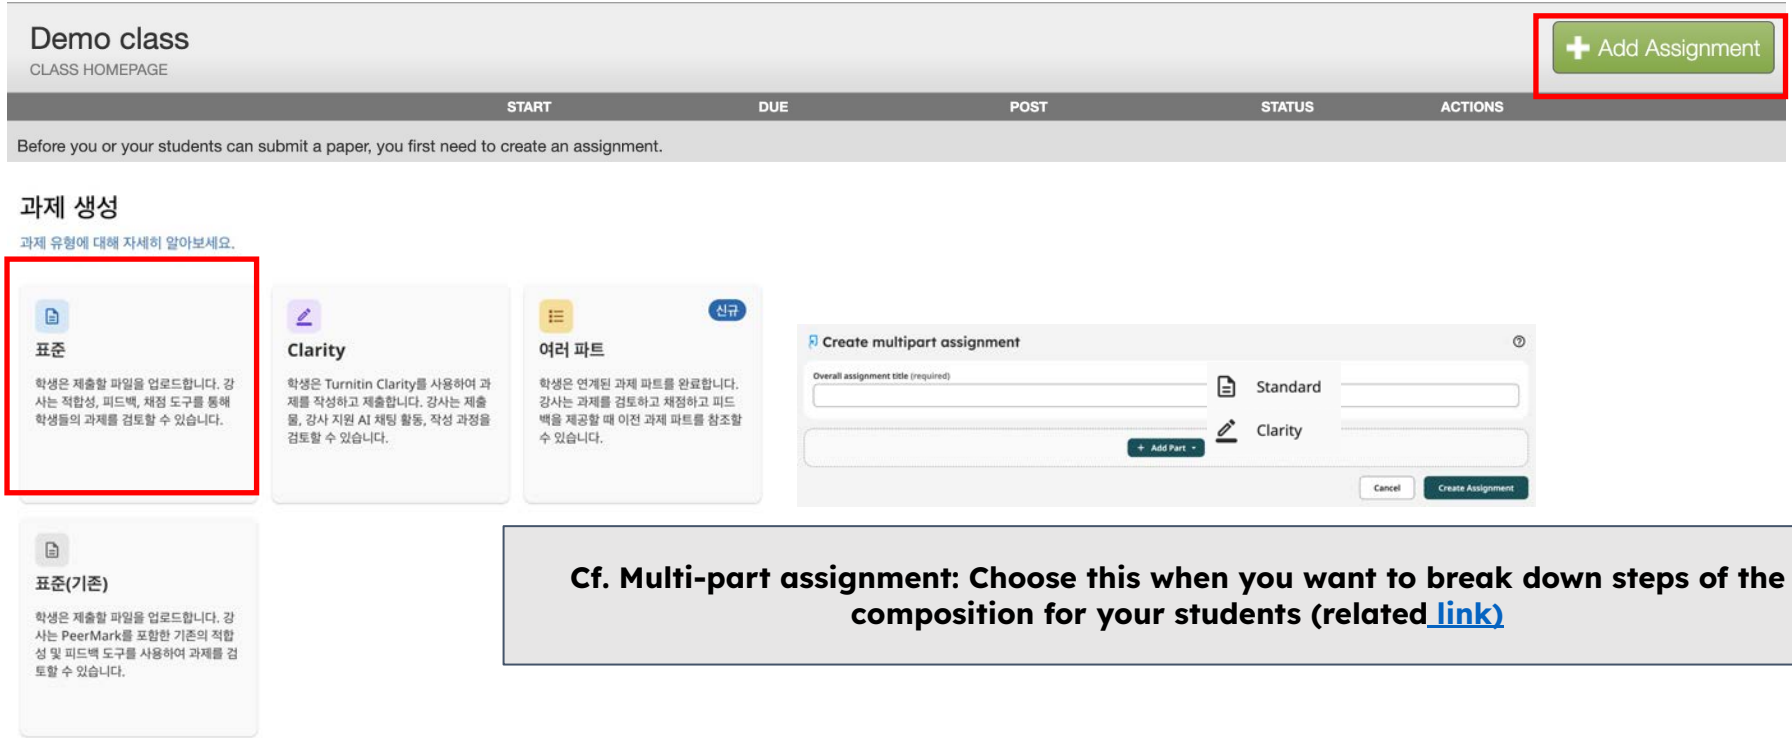

Create a Class

Click 'All Classes' tab > Click 'Add Class' > Enter Class Name, Enrollment Key (alphanumeric or a mix of both), select Subject Area and Student Home Department, click 'Submit' > Click 'Continue' > Click the created class name

Assignment creation - Standard Assignment

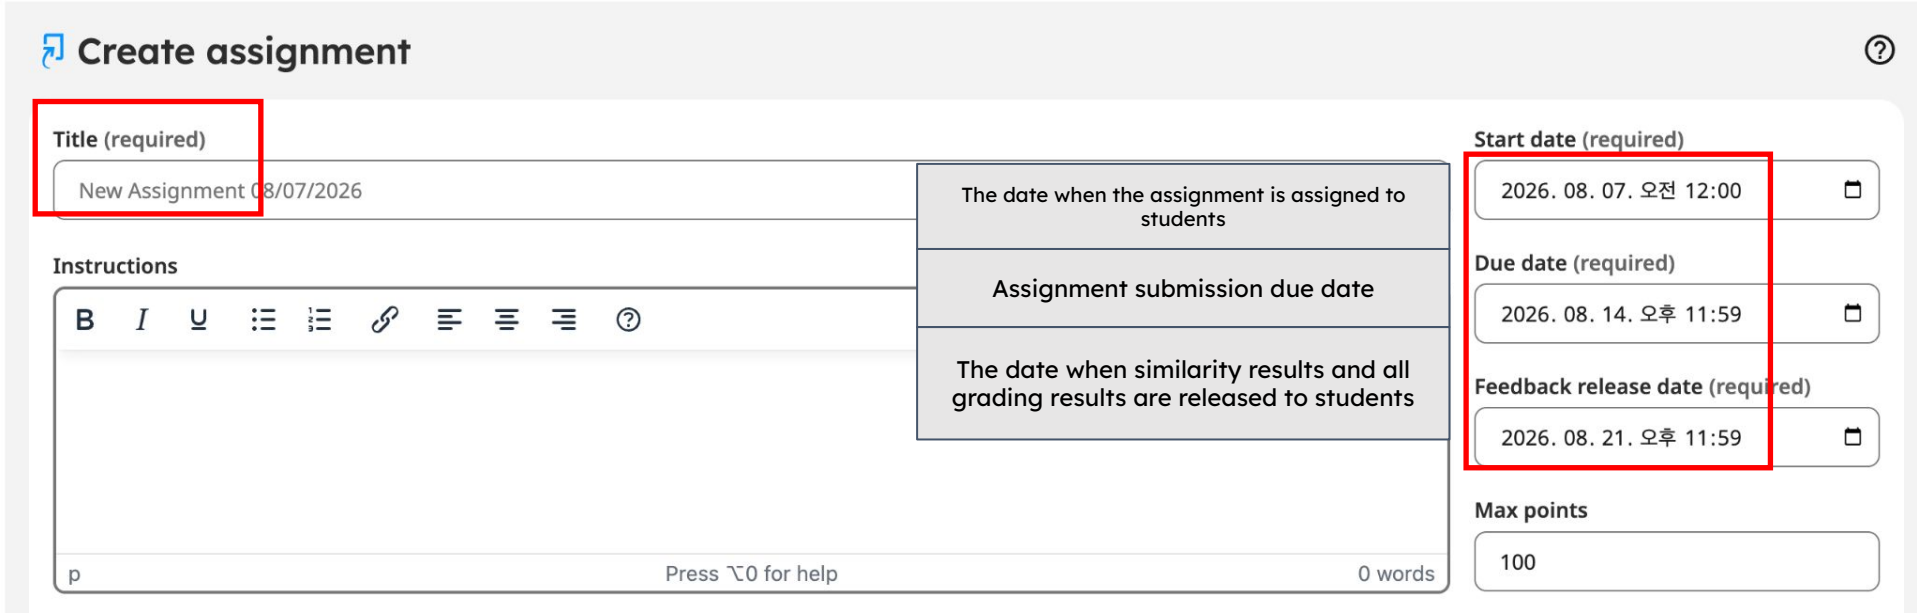

Click 'Add Assignment' > Click '표준 (Standard Assignment) '

Cf. Multi-part assignment: Choose this when you want to break down steps of the composition for your students (related link)

Create Standard Assignment

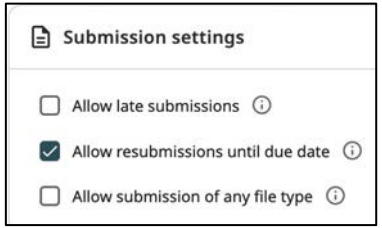

Enter Title > Set Start Date, Due Date, and Feedback Release Date

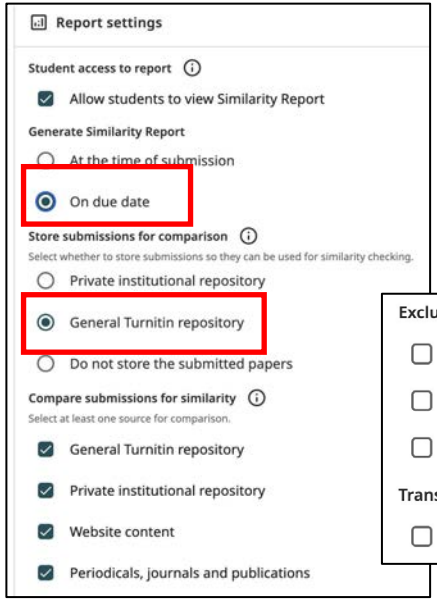

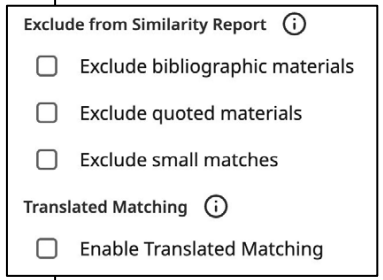

Creating a Standard Assignment

Select items for your preference. FYI. To compare papers against both the Turnitin database and other students' submissions in the same class, select 'Standard Turnitin database', set report generation to 'on due date', then click 'Create Assignment' at the bottom.

- **Peer comparison is required to prevent plagiarism among students in the same class. Store student papers in the Turnitin database to generate similarity reports all at once on the due date (Select 'General Turnitin repository' + 'on due date').**
- If peer comparison is not required, you may select 'Do not store submitted papers' and set report generation to 'At the time of submission'.
- To modify settings after creating the assignment, click 'Edit settings'.

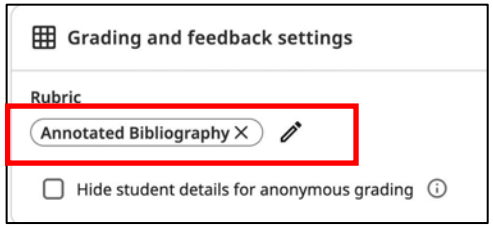

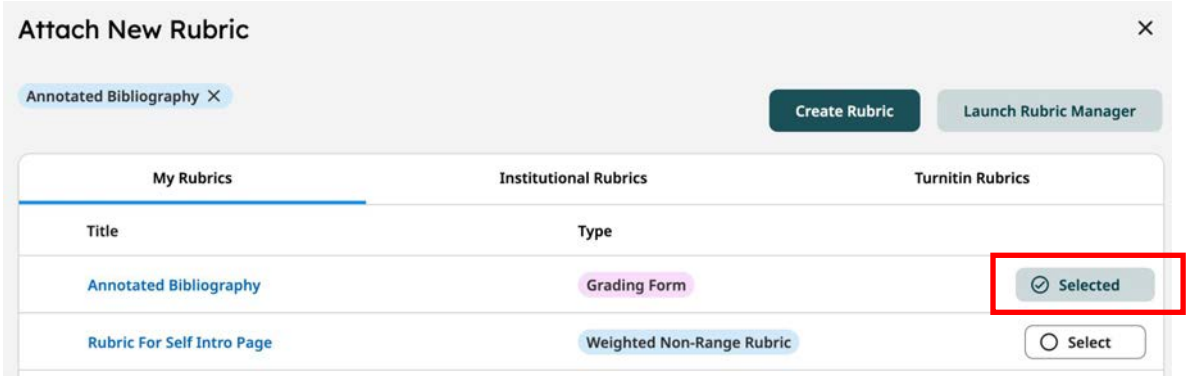

Creating a Standard Assignment

- **Select the desired rubric from the suggested list (click each rubric to check details) > Click 'Save Assignment'**
- **Click 'Create Rubric' to create a custom rubric (Optional)**

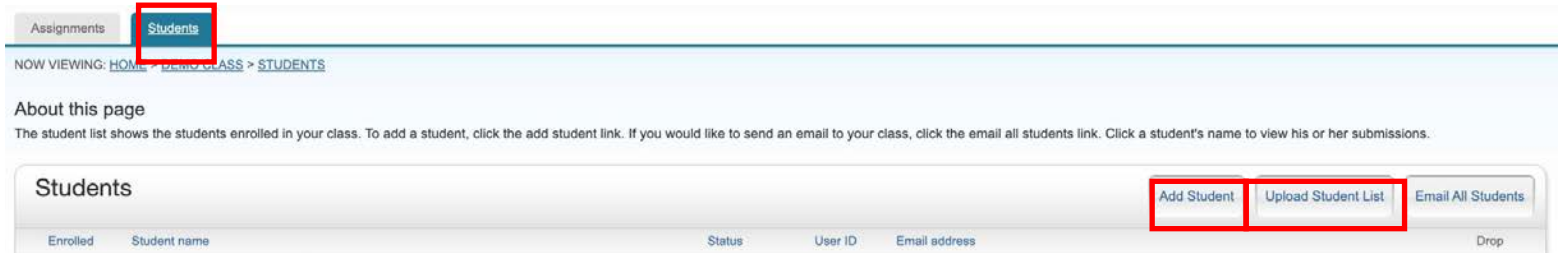

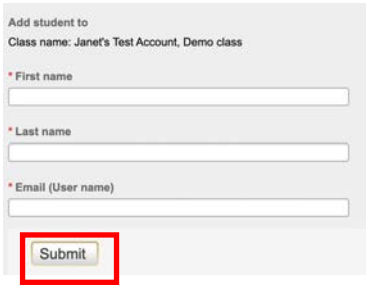

Full Guide [link]

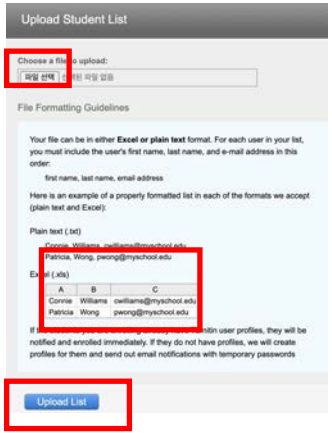

Inviting Students

- **Click 'Students' tab > To add 1 student, click 'Add Student', enter first/last name and email, then click 'Submit'**
- **To bulk-register multiple students, click 'Upload Student List' > Click 'Choose File', upload the formatted file, then click 'Upload List'**

- **Once added, students will receive an invitation email. They can submit assigned tasks directly after setting up their account as instructed in the email. (Refer to 'Uploading Submissions' in the Student Manual)**
- **How instructors can upload submission files on behalf of students [Link]**

Checking Results

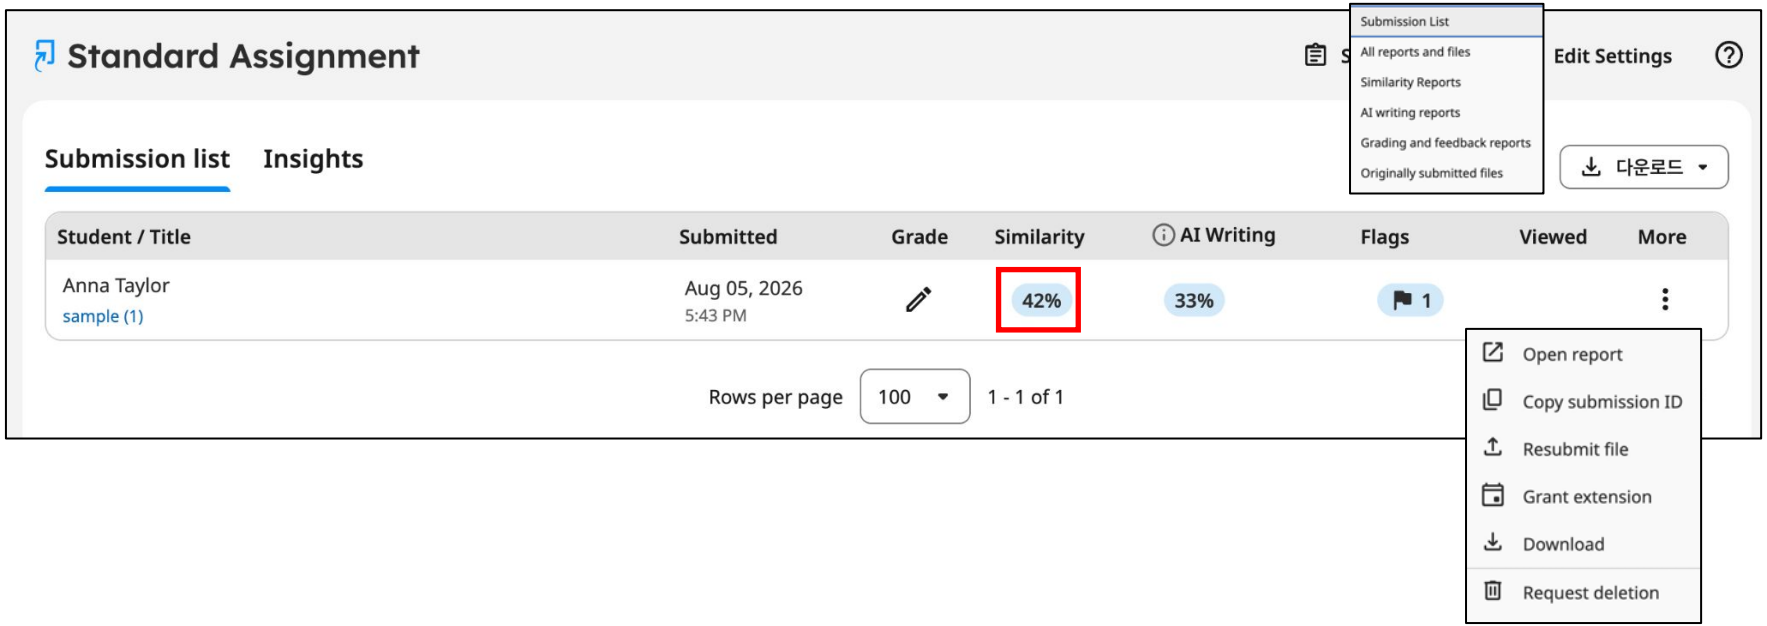

Once student submissions are complete, click Class Name > click Assignment Name > click 'View'.

Full Guide [Link]

Checking Results

To check the results of students' submissions, click on the '%' in the 'Similarity' column of the submission to view the results.

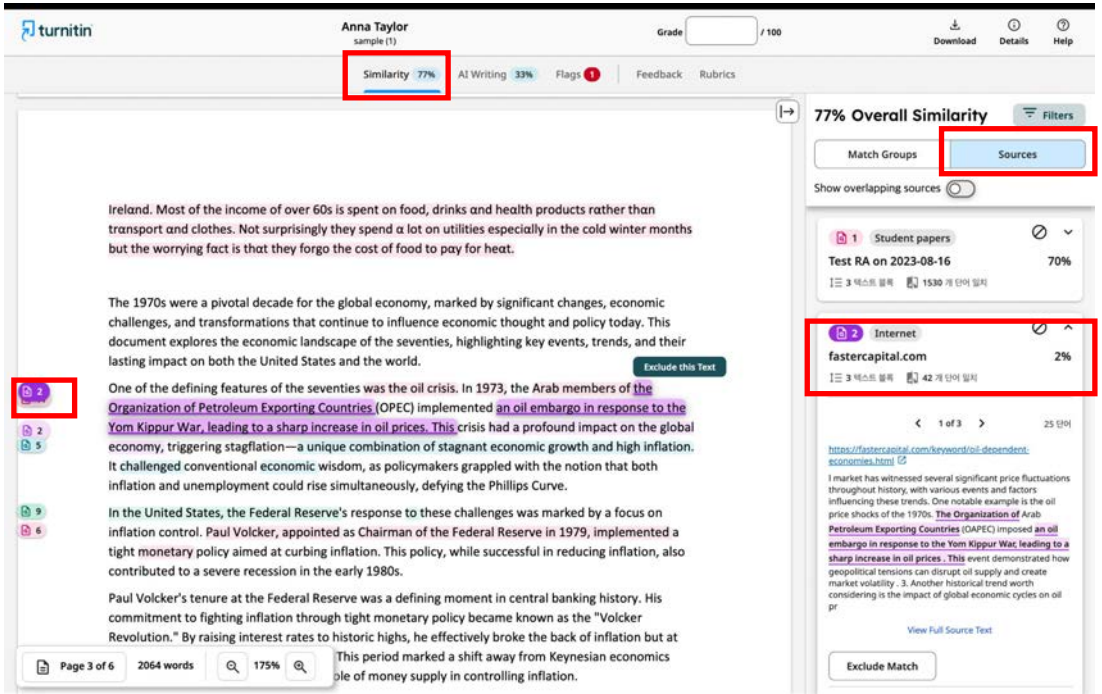

Full Guide [Link]

Checking Results (Similarity (Sources))

The highlighted text indicates sections that match sources within the Turnitin database.

The sidebar number represents the overall similarity percentage. Clicking the 'Sources' button sorts the list starting from the primary source. Clicking on any source navigates to and highlights the matching section in the text.

* Clicking 'Sources' displays the sources of the matched parts, sorted by the highest matching percentage.

* The similarity score is not a plagiarism rate; it is simply an indicator of sections matching the database.

* The color and number of each source match those in the body text. Clicking a source navigates directly to the corresponding section.

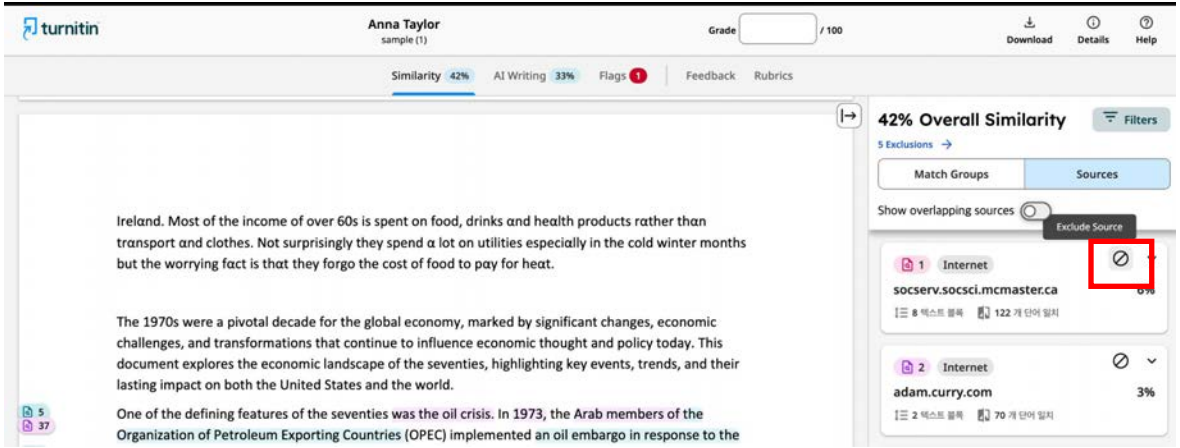

* Multiple sources may exist for the same section. Clicking each source allows you to check details of the text match. (Overlapping sources display can be toggled ON/OFF)

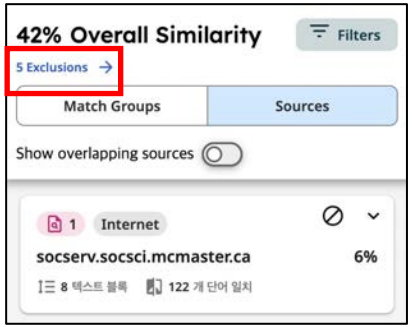

Checking Results (Similarity (Sources))

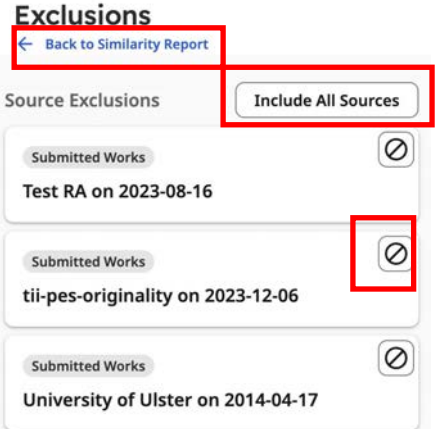

-Sources excluded from a specific source are displayed in blue

under the overall similarity section > Click '(Number) Exclusions' >

-Clicking 'Include All Sources' restores all excluded sources (you can also selectively restore each excluded source by clicking its restore icon).

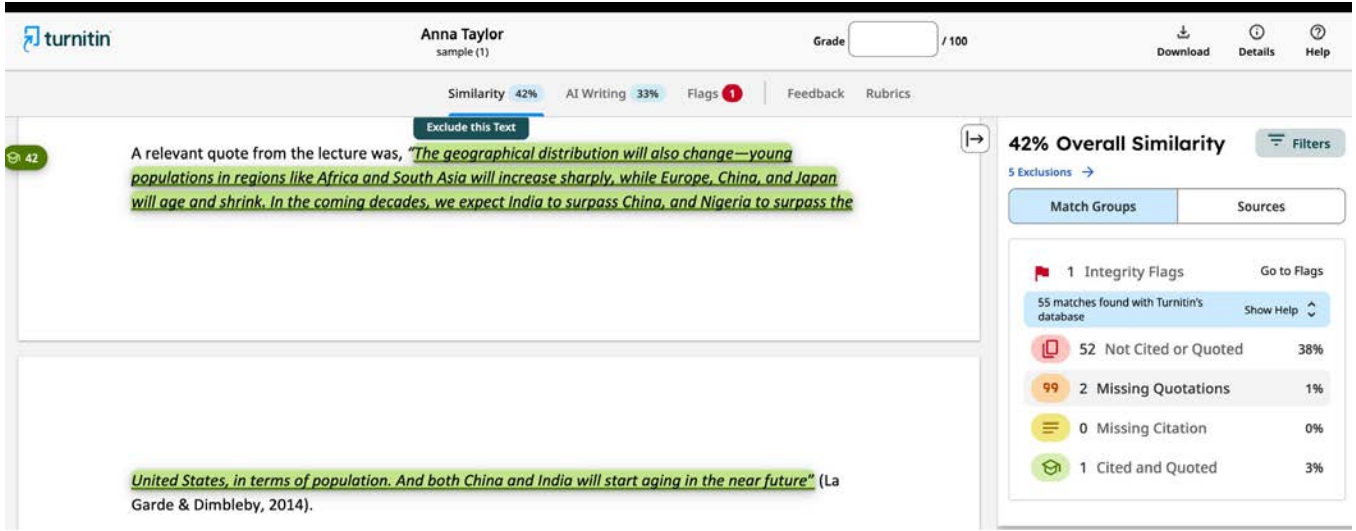

Similarity (Match Groups)

Clicking 'Match Groups' displays matched content in 4 groups by characteristics (Only for English submissions)

*Not Cited or Quoted - The number of text matches that are not written as a quotation or has no citation to its original source.

*Missing Quotations - This text is cited, but the match is so exact that it may also require quotation marks.

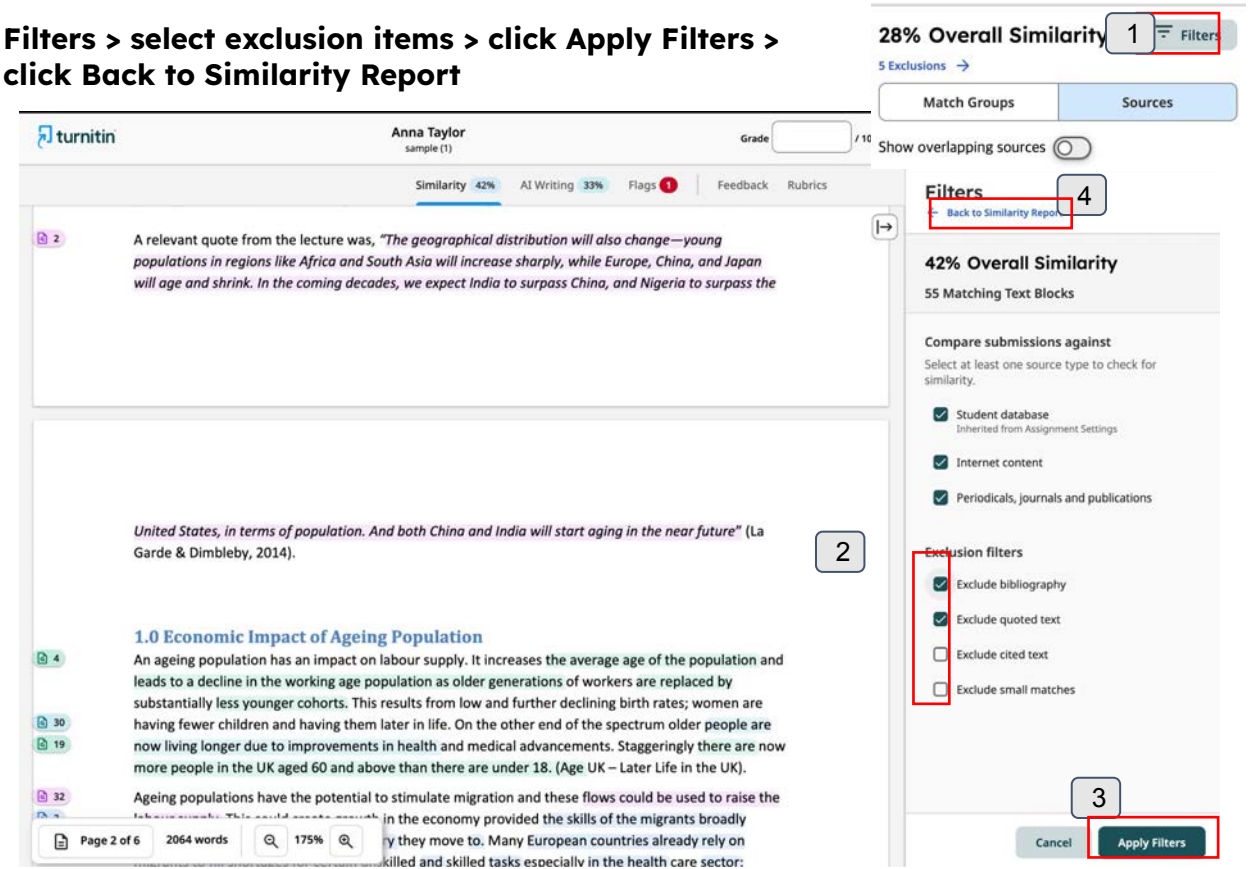

*Missing Citation - This text is written as a quote, but lacks a citation to its original source.

*Cited and Quoted - This text contains a quotation and is cited to a source. You may want to review them for your preferred formatting.

Match group guide link

Similarity - Filters (Exclusions)

Filters > select exclusion items > click Apply Filters > click Back to Similarity Report

1. Click 'Filters'

2. 'Exclusion Filters': If you wish to temporarily exclude certain items for convenience of review, check the box next to them.

1. **Exclude bibliography:** Excludes the reference list at the end of the paper.
2. **Exclude quoted text:** Excludes direct quotes wrapped in double quotation marks ("...").
3. **Exclude cited text:** Excludes text that has been cited.
4. **Exclude small matches:** *Do not change*

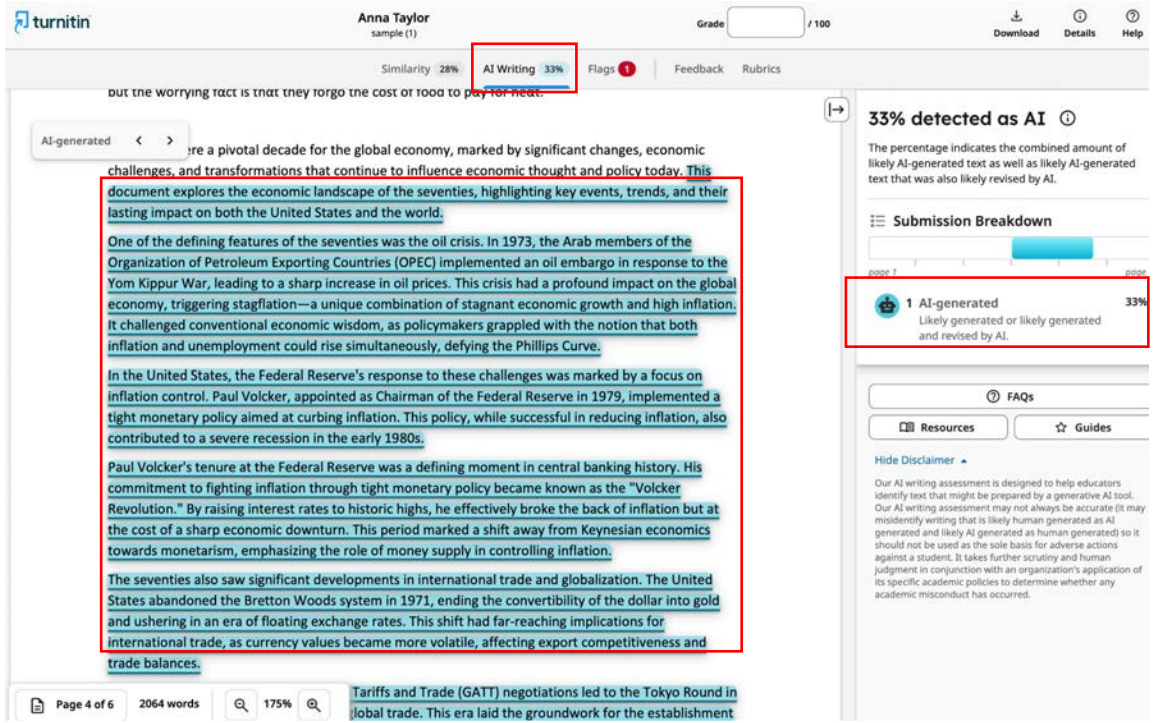

3. Check desired options and click 'Apply Filters' at the bottom.

*To restore, uncheck and click 'Apply Filters' again.

4. Click <- Back to Similarity Report to finish.

AI Writing Detection

Click 'AI Writing' in the report tabs and then click the 'AI-generated' section to highlight text suspected to be written by AI within the body

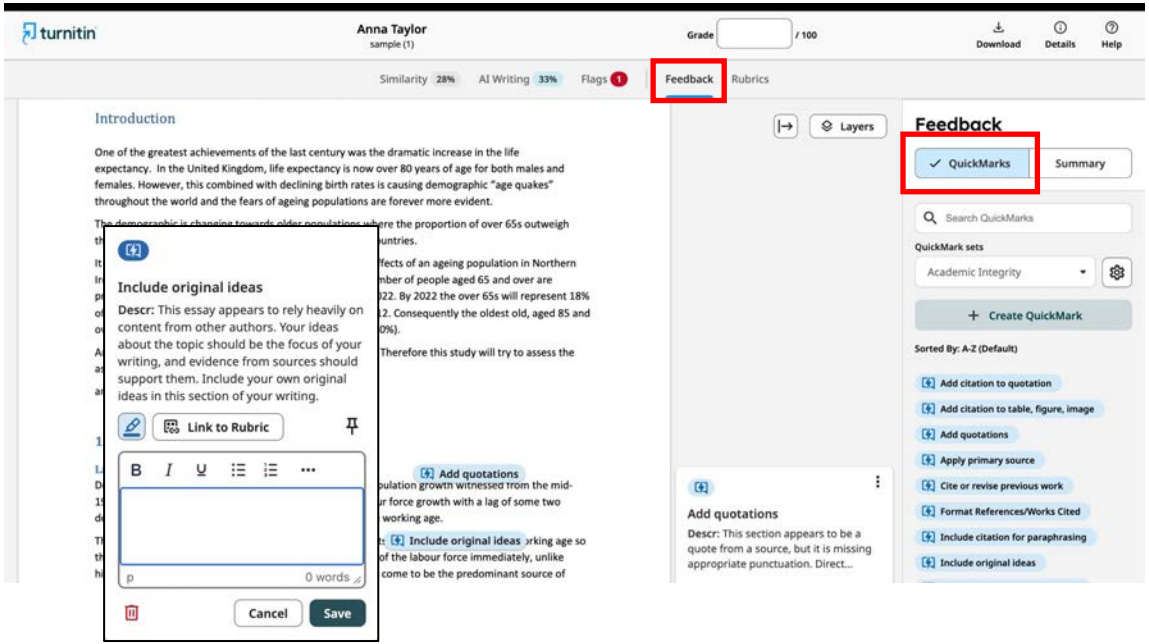

AI Writing Detection: Displays AI-written percentage of the total and highlights the corresponding sections.

- Note: Currently supported for English, Spanish, Japanese, and Arabic submissions (Korean AI detection in development). Applies to prose text between 300 and 30,000 words. Detailed percentage not shown if under 20%. Visible to administrator and instructor accounts.
- False Positive Rate (FPR): Less than 1%
- Detection Targets: LLMs and LLM-based models, including existing and latest versions (GPT-5, GPT-5.1, Gemini-2.5-pro, Gemini 2.5 Flash, etc.)
- Also detects AI-generated content that has been reprocessed using paraphrasing tools

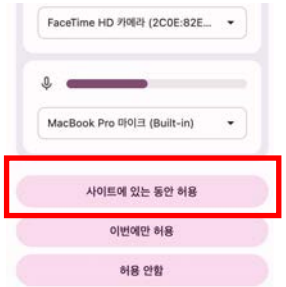

Full guide link

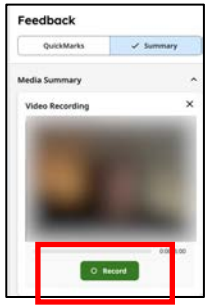

Feedback & Grading

- **Click the 'Feedback' tab at the top. Select a QuickMarks set > Drag-and-drop to desired locations (edit using the three-line icon, pin important feedback with a PIN)**
- **Click the 'Summary' tab to provide video/audio feedback (up to 5 minutes) or a text summary**

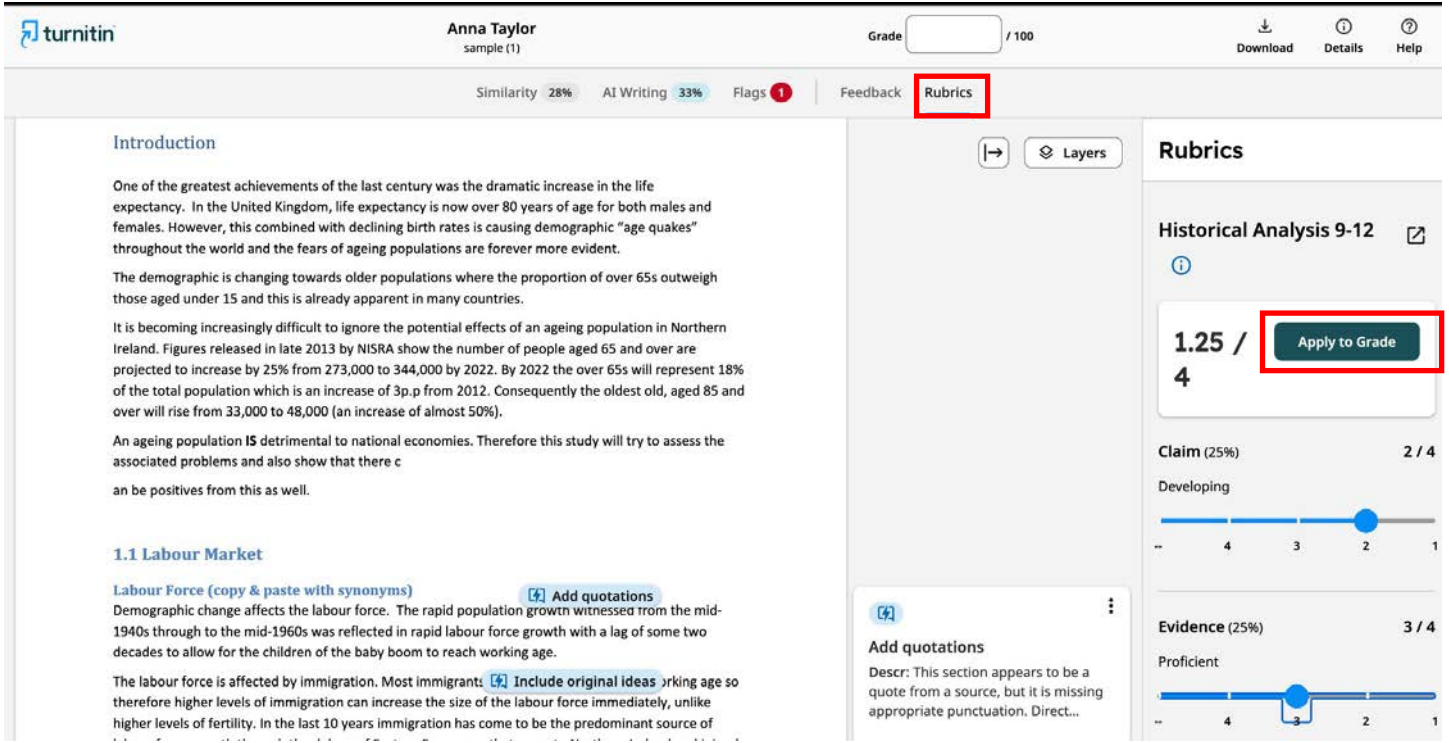

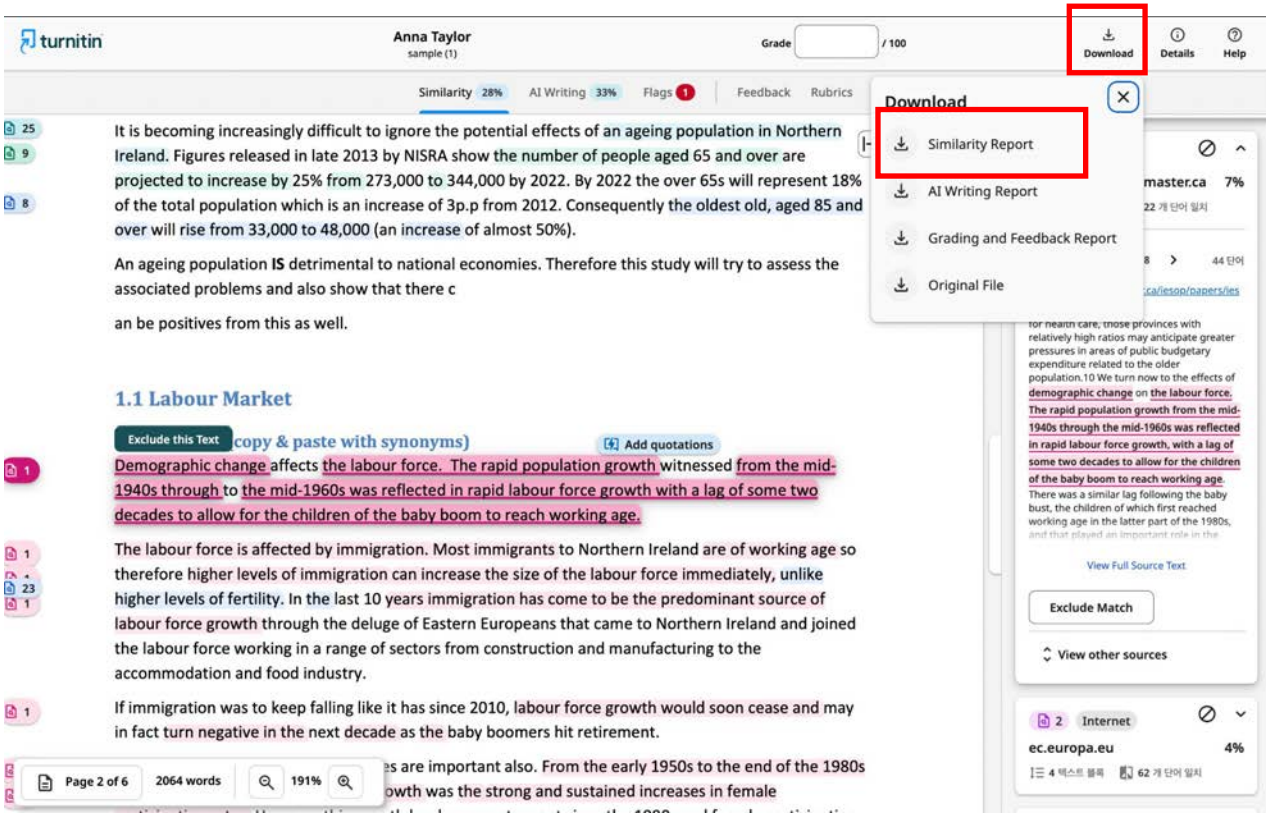

Rubrics & Grading

- **Click the 'Rubrics' tab to assign scores for each criterion based on the selected rubric**
- **[Detailed Guide Link]**

Downloading Reports

To download results, click the 'Download' icon at the top > click 'Similarity Report'

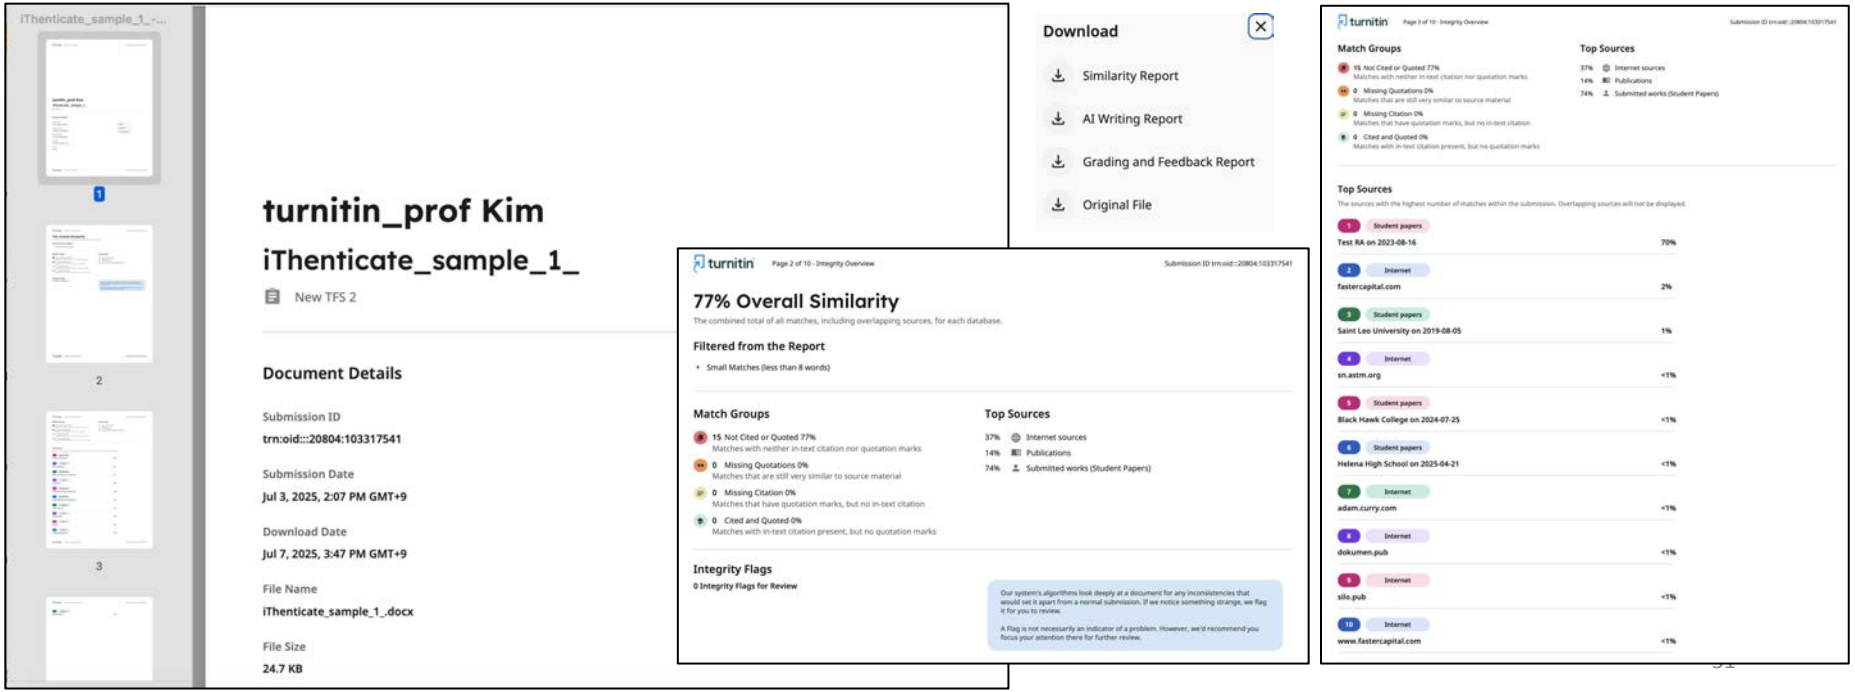

- To download results as a PDF:

Click the arrow icon at the top > Click Similarity Report / AI Writing Report

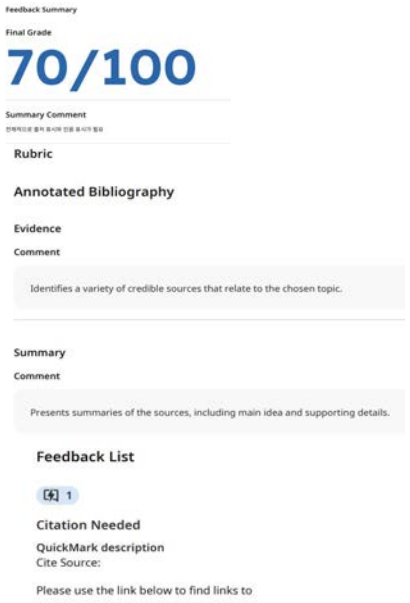

Download: Similarity report

-Downloaded 'Similarity Report': The first cover page of the PDF and the next page showing the similarity %, the page listing sources, and then the highlighting of matched parts within the text.

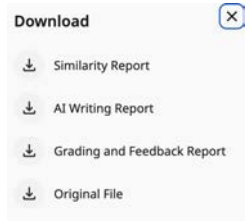

Download: Grading and Feedback report

- Downloaded 'Grading and Feedback Report': Includes scores, feedback, grading results according to the rubric, etc.

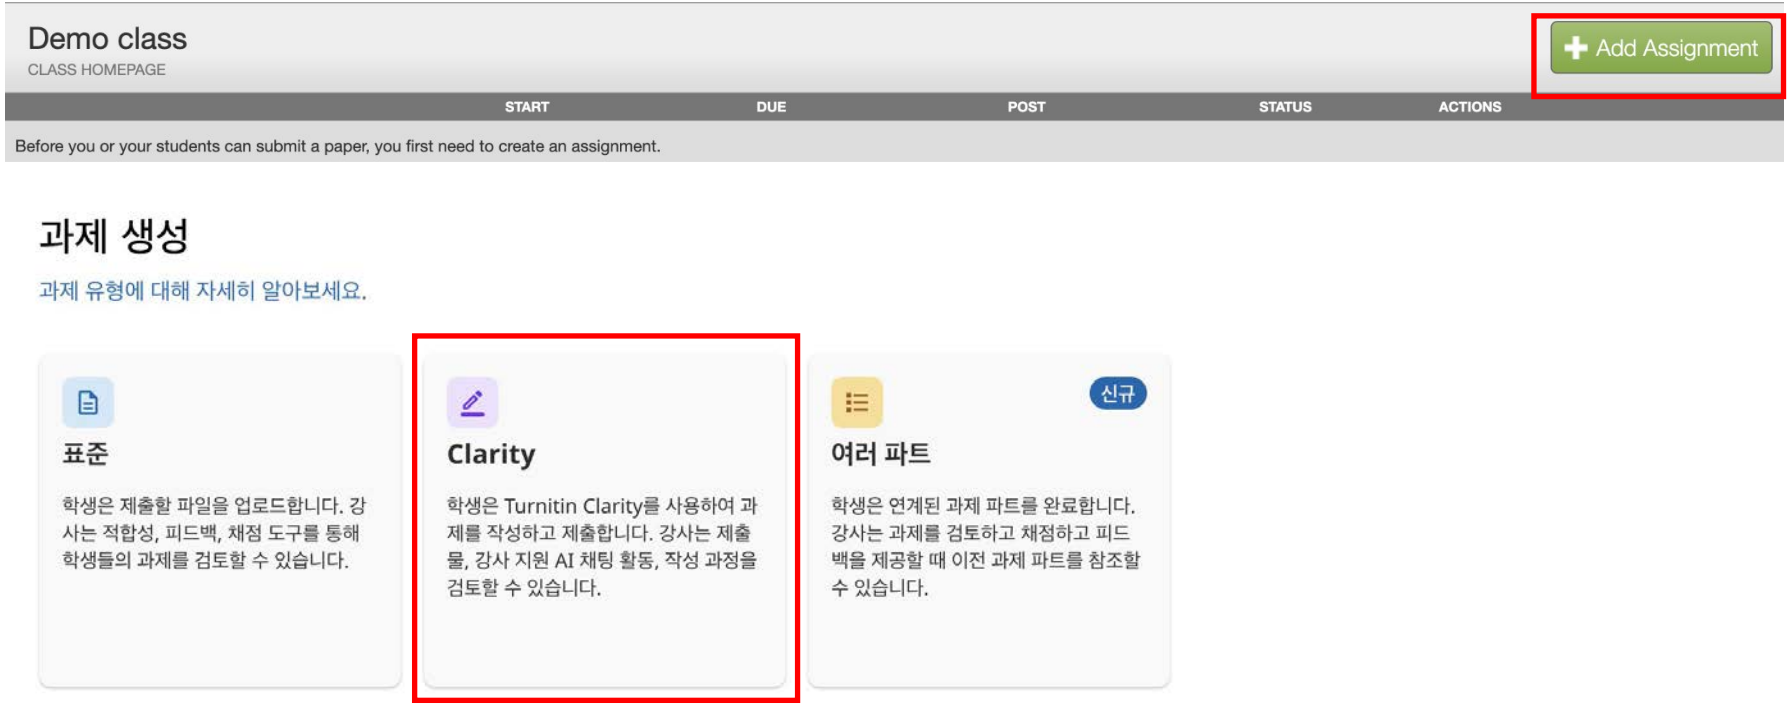

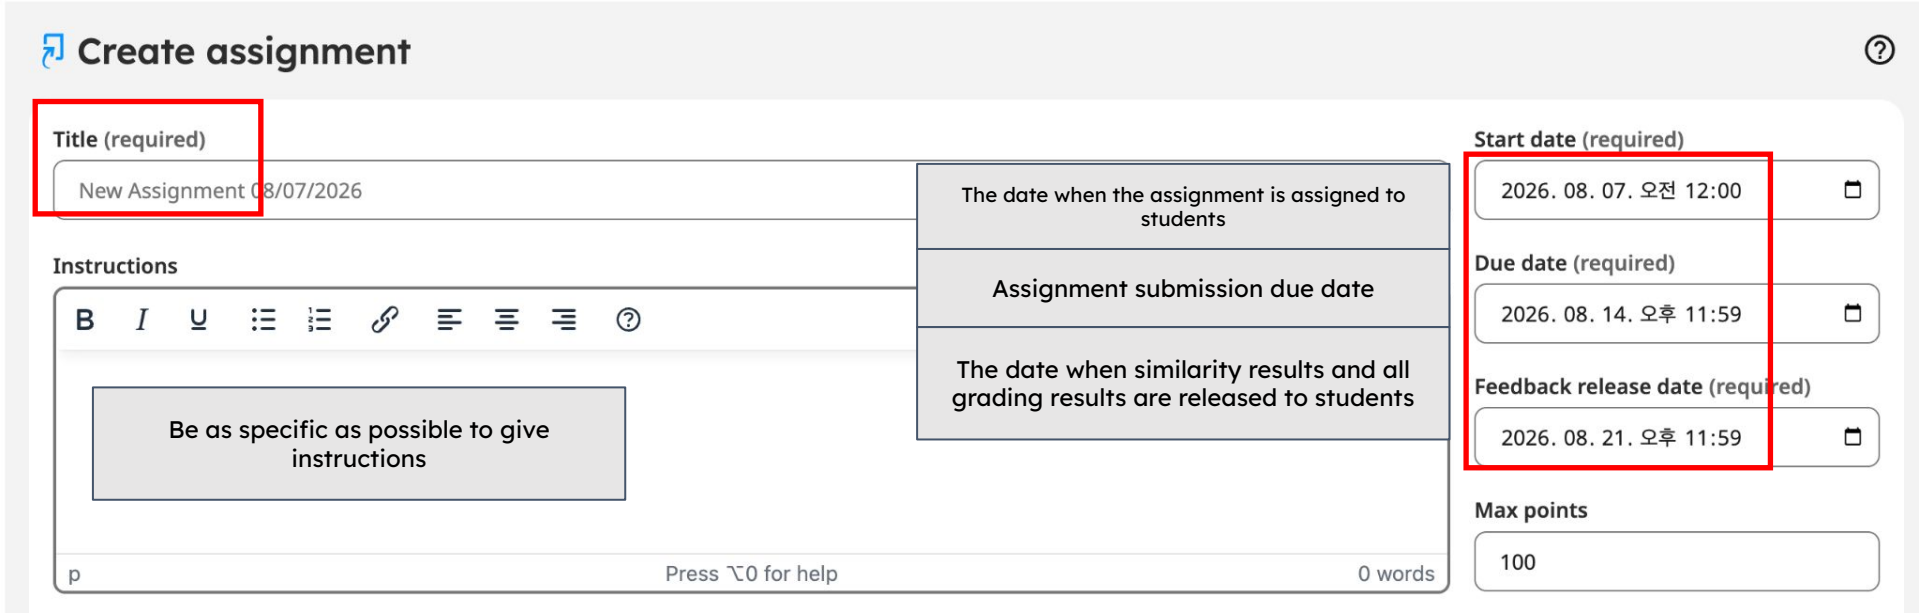

Assignment creation - Clarity

Click 'Add Assignment' > Click ‘Clarity '

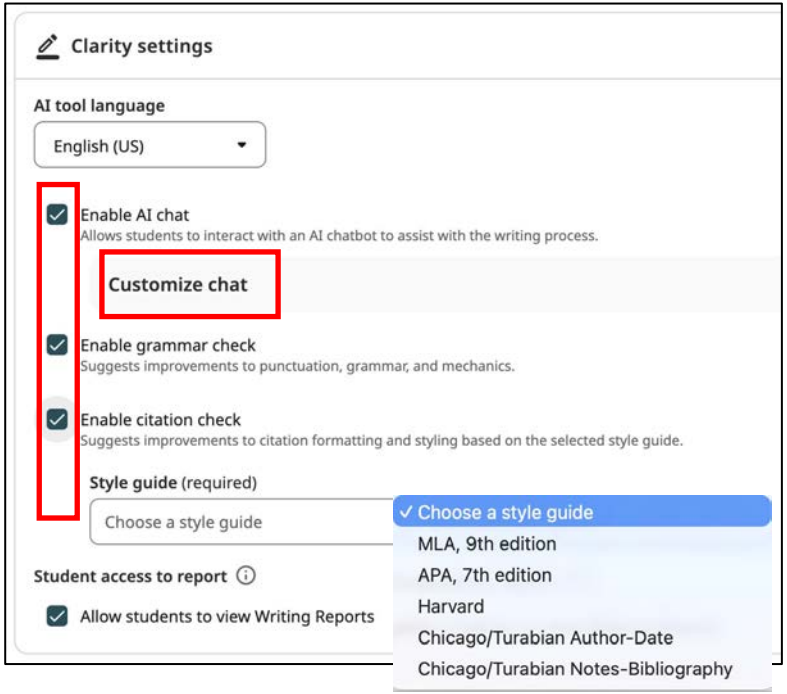

Assignment creation - Clarity

Enter Title > Set Start Date, Due Date, and Feedback Release Date

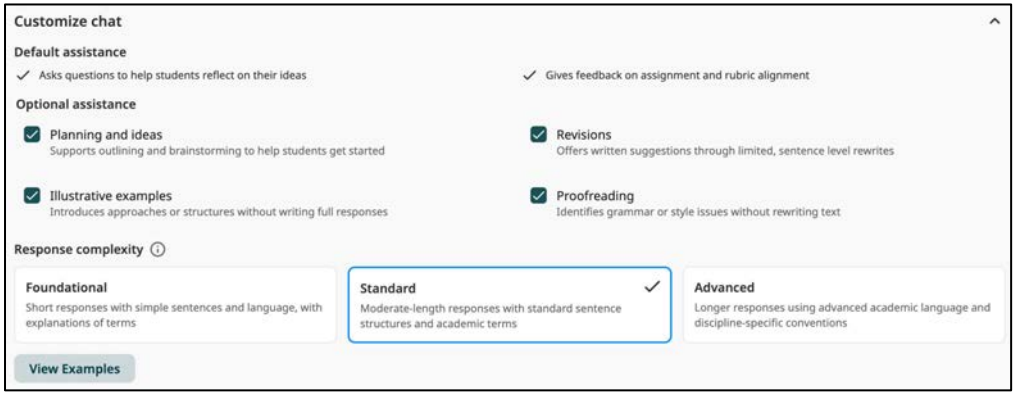

Assignment creation - Clarity

de

***Enable AI Chat in Clarity settings to select support options and response complexity**

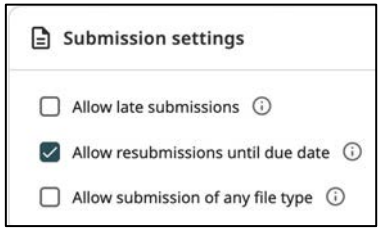

***Grammar check and citation check tools are also available**

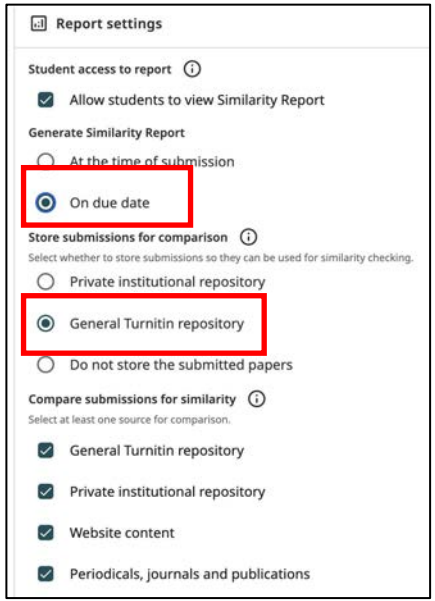

Assignment creation - Clarity

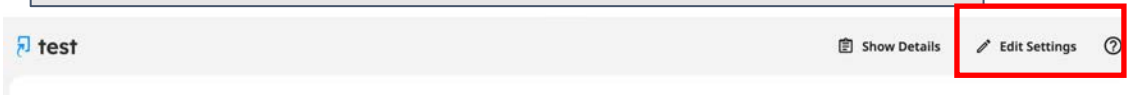

Select items for your preference. ***To compare papers against both the Turnitin database and other students' submissions in the same class, select 'General Turnitin repository', set report generation to 'on due date', then click 'Create Assignment' at the bottom.**

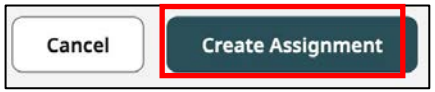

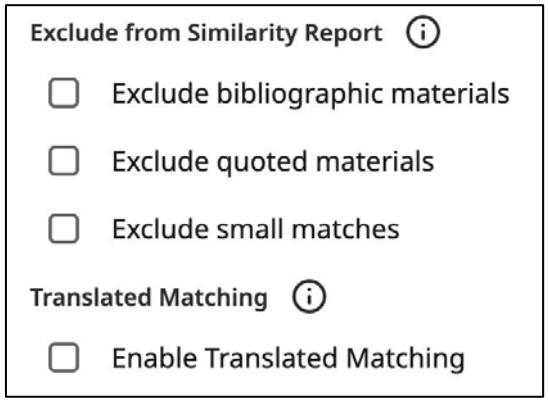

- **Peer comparison is required to prevent plagiarism among students in the same class. Store student papers in the Turnitin database to generate similarity reports all at once on the due date (Select 'General Turnitin repository' + 'on due date').**
- If peer comparison is not required, you may select 'Do not store submitted papers' and set report generation to 'At the time of submission'.
- To modify settings after creating the assignment, click 'Edit settings'.

Assignment creation - Clarity

'Exclude' options include 'Exclude bibliographic materials' and 'Exclude quoted materials'. These can be applied globally during assignment creation or individually on each report screen.

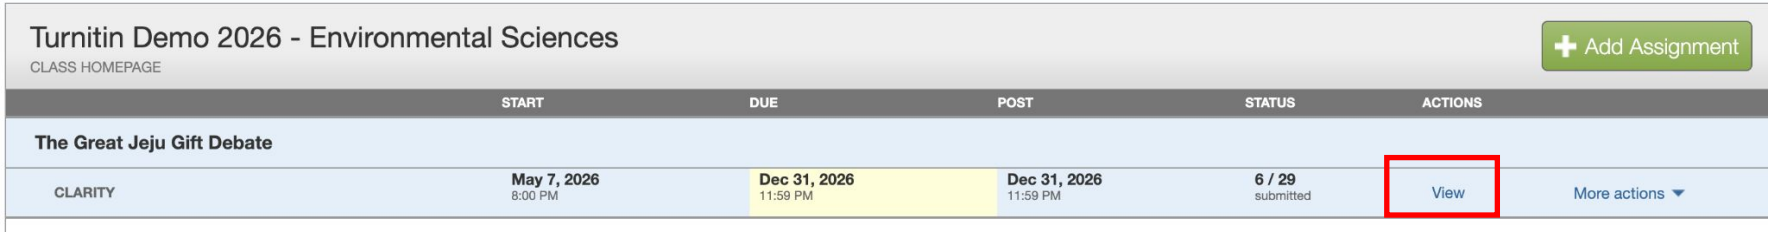

(Checked items apply upon saving. To restore, uncheck the box and save the assignment again.)

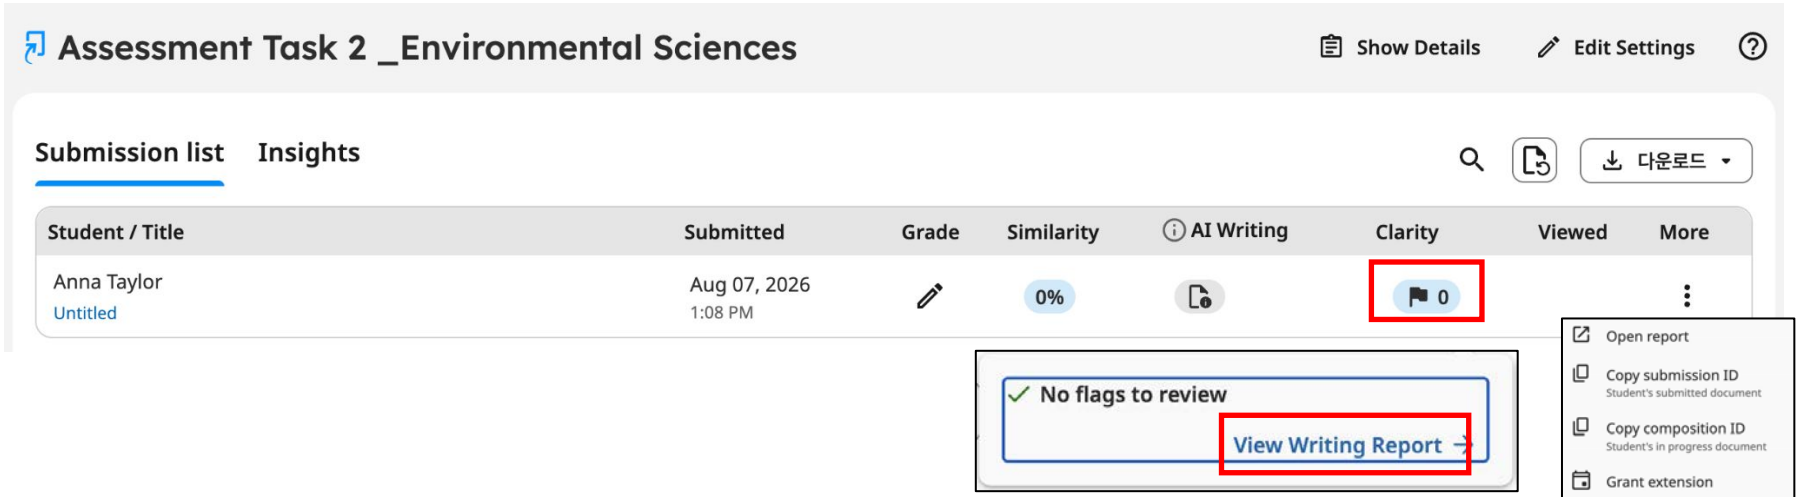

***Excluding small matches is not recommended for arbitrary configuration.**

Enable Translated Matching is a Beta feature that translates non-English submissions to display comparison results with the English database (Reference Link).

Click 'Create Assignment' to save.

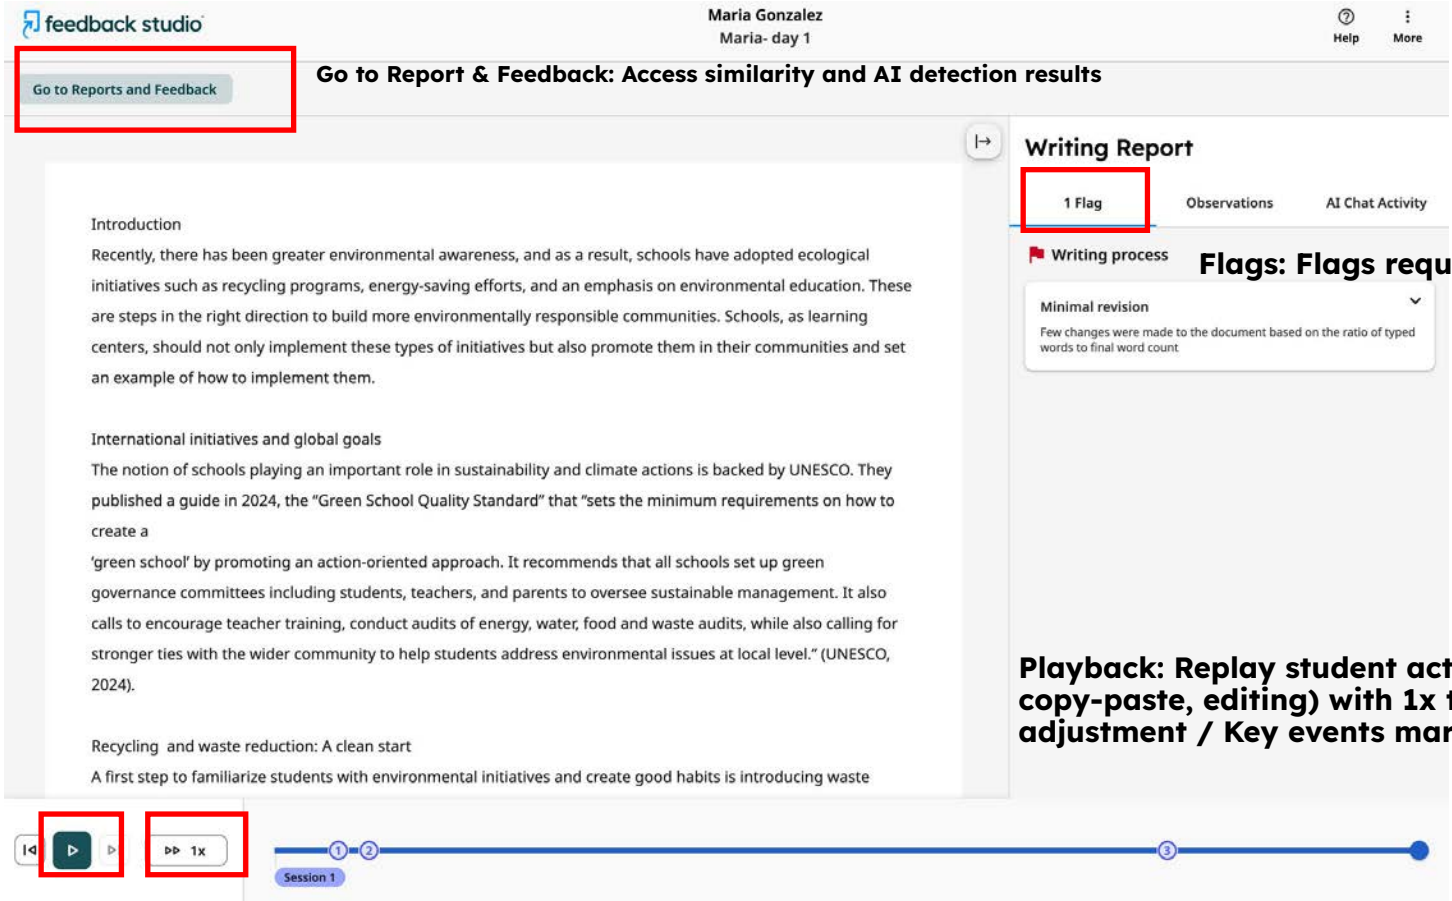

Checking Clarity Results

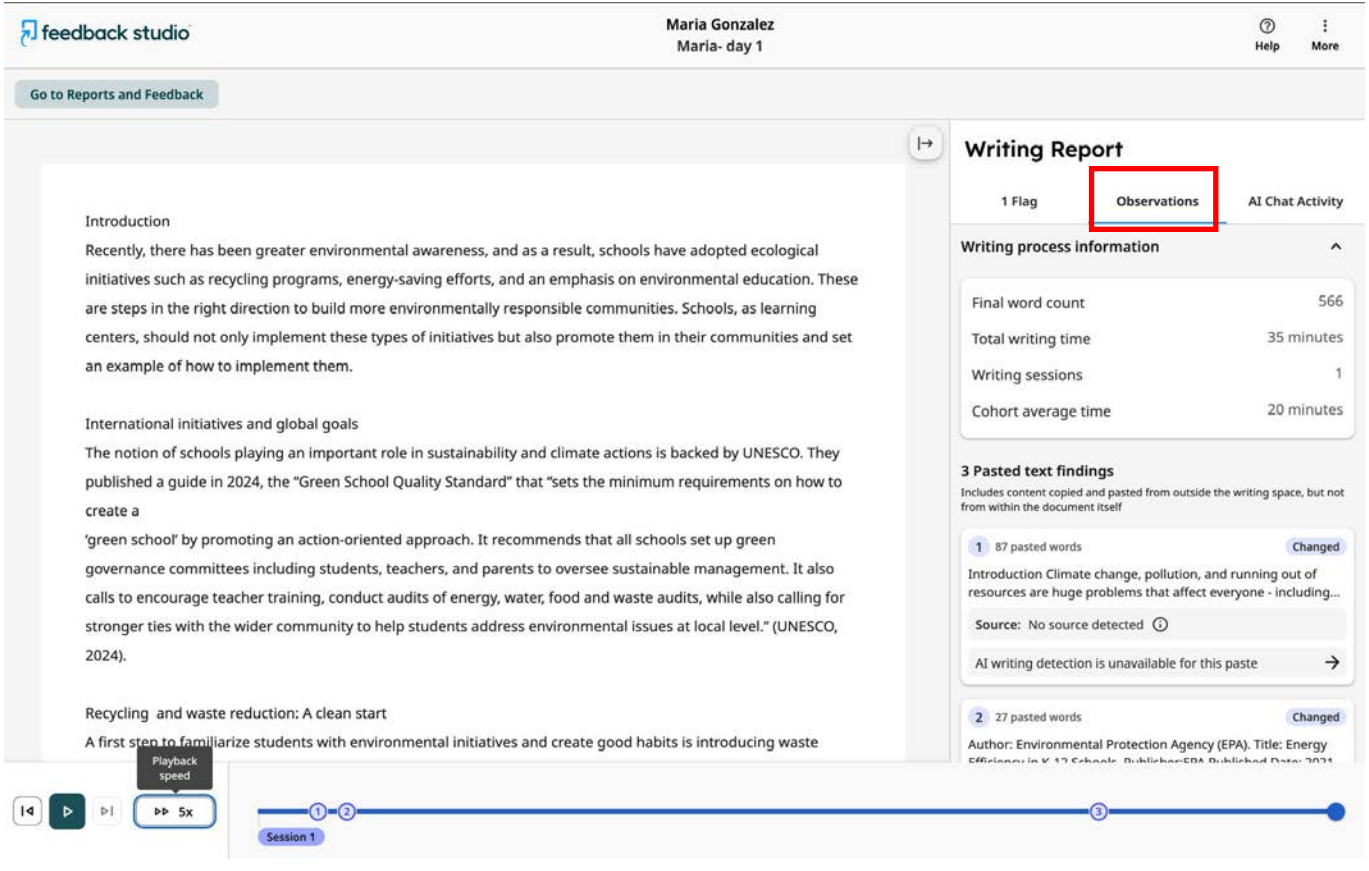

To check the results of students' submissions, Click the class name > click 'view' > click the flag in the 'Clarity' section of the submission > click 'View Writing Report' to view the results.

Checking Clarity Results

Checking Clarity Results

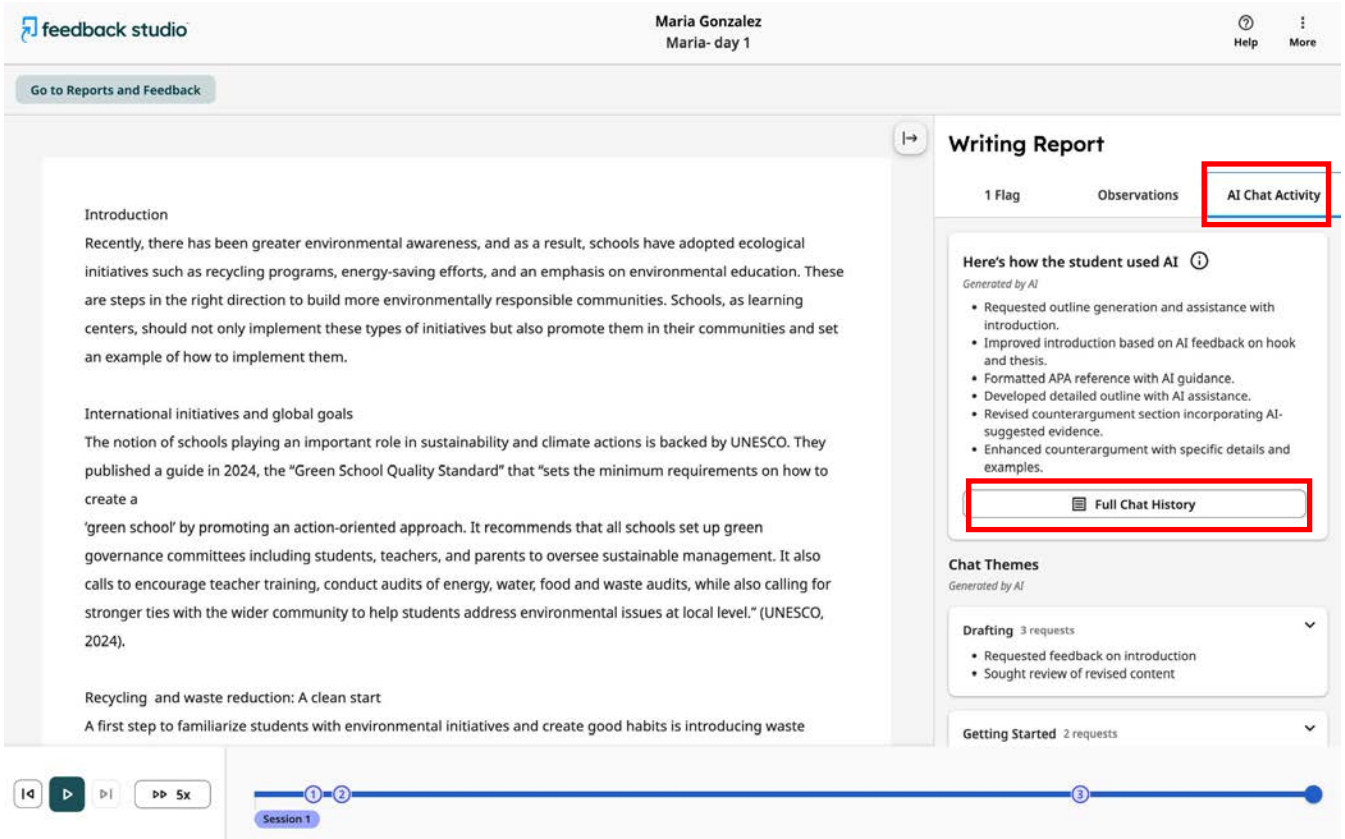

Observations:

- Final word count
- Cohort average time
- Total writing time
- Pasted text findings &

edit history can be viewed

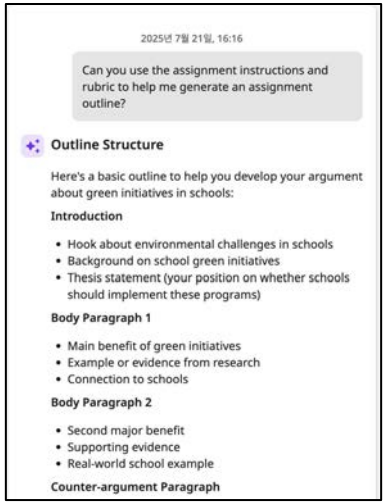

Checking Clarity Results

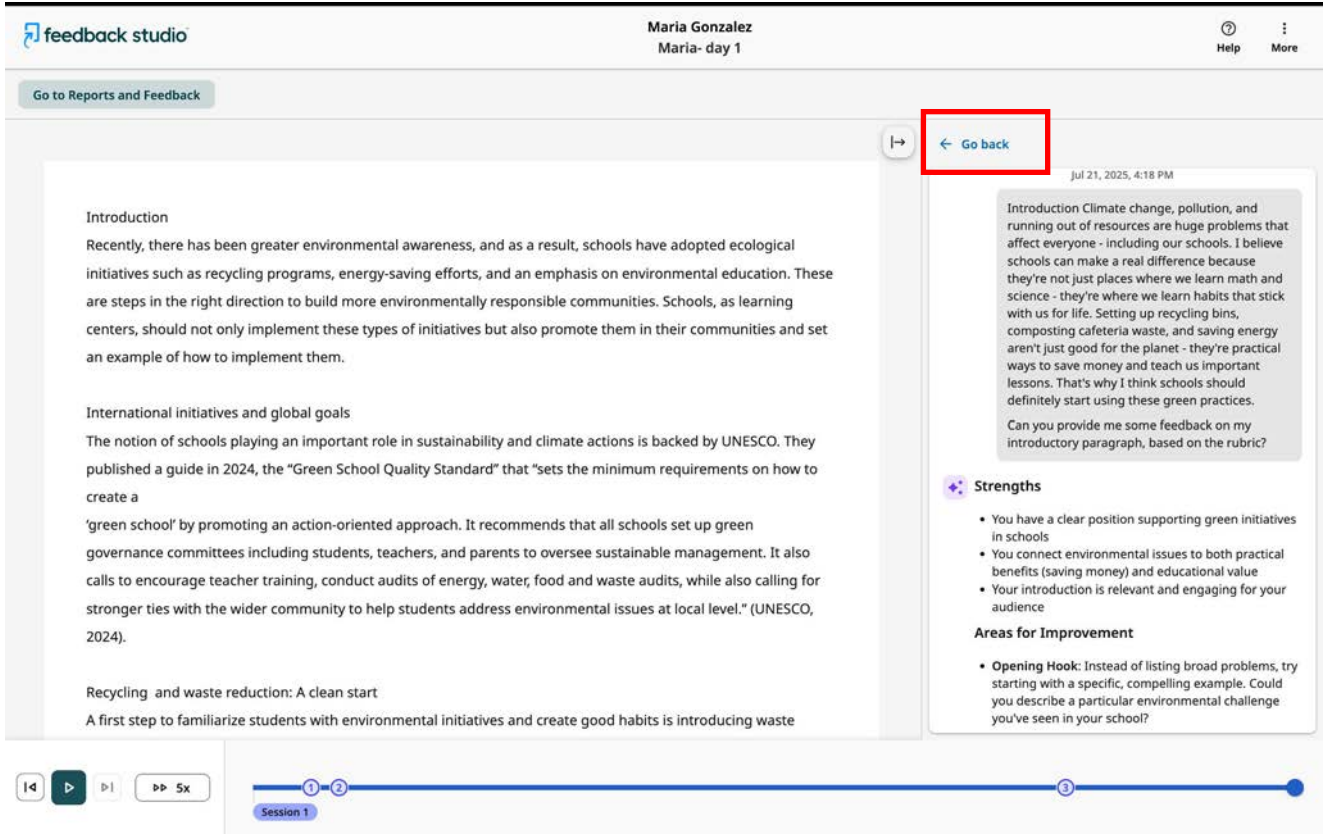

AI Chat Activity:

Provides a summary of how the student used AI, organized by chat themes.

Clicking 'Full Chat History' allows viewing the student's complete AI chat records.

Checking Clarity Results

Click 'Go back' to return to the main Clarity results screen from the full AI chat history view.

Click 'Prompts' to view suggested prompts

FAQs

Q1. I've forgotten my password. How do I reset it?

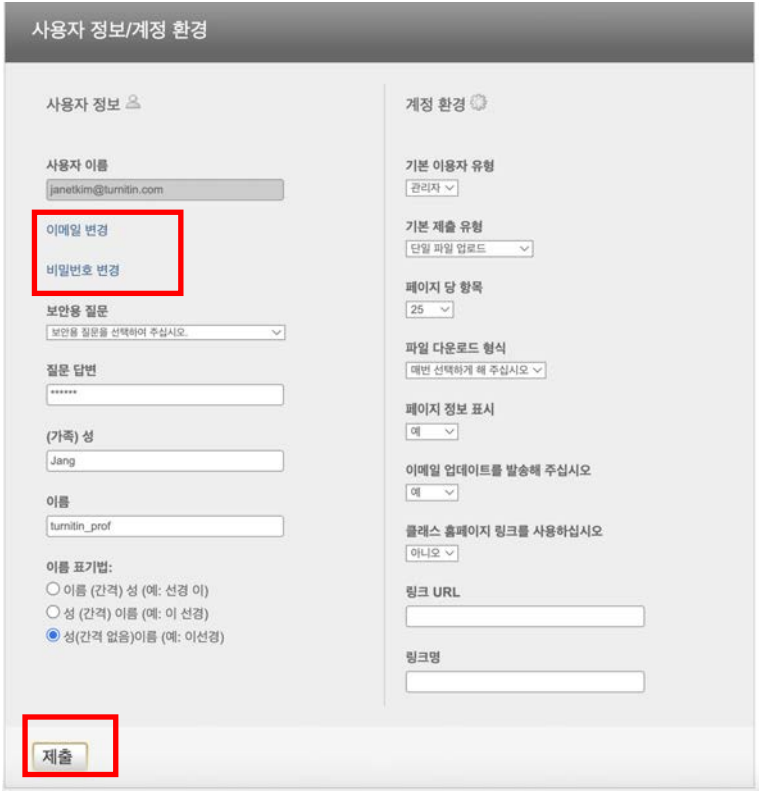

Click the password reset link to reset your password according to the instructions in the image below. Please note that the combination of email and last name for step 4 of the reset process should be based on the information you provided when you signed up. If your account was automatically created by submitting a Turnitin assignment through an LMS and you are resetting your password, please use the last name associated with your LMS account. If you require further assistance, please send a password reset request email to koreasales@turnitin.com.

FAQs

Q2. Where can I change my member information (email, name, password, etc.)? Click your name among the black buttons at the top to modify.

FAQs

Q3. Can I use Turnitin assignments in an LMS?

You can create and use Turnitin assignments through an LMS as well.

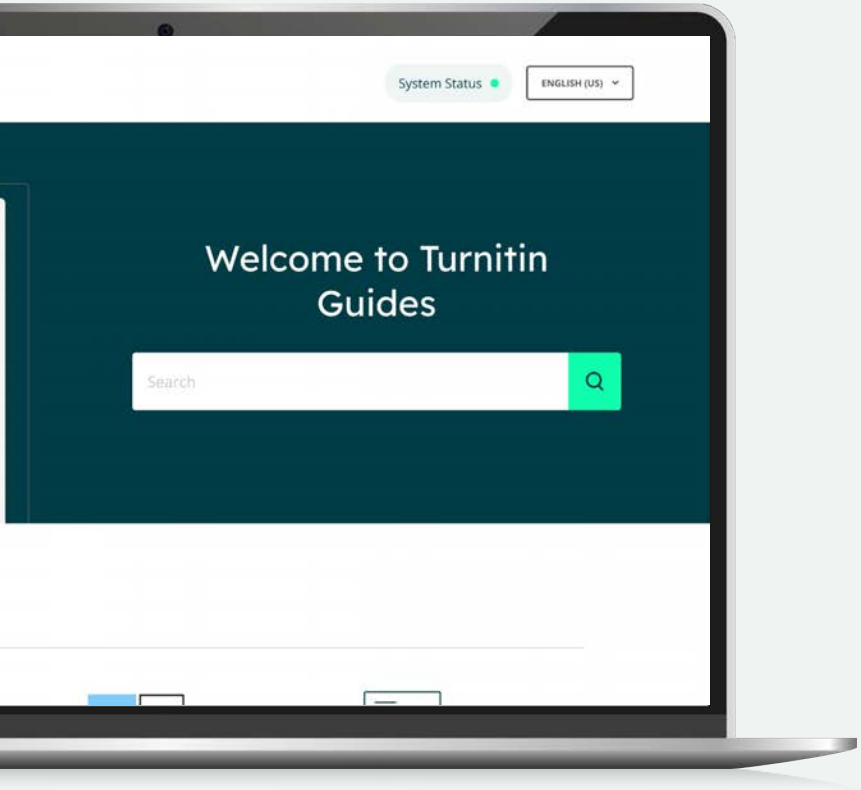

However, please keep the following points in mind:

1. **When you create a Turnitin assignment in an LMS, a Turnitin account is created with that email. In this case, you can use it after resetting your password on the turnitin.com website without requesting a separate instructor account.**
2. **If the LMS is not the latest LTI 1.3 version, the Turnitin interface may differ from the New TFS screen in this manual (Classic version vs. New TFS).**
3. **Additionally, Turnitin Clarity, which allows you to view the student writing process, can only be used with LMS on LTI 1.3 or via the turnitin.com website.**

Q4. I logged in to Turnitin but it says the class is unavailable.

For security reasons, accounts that have not been accessed for a long period of time are "temporarily locked" and cannot use the service. In this case, please send a "temporary unlock request" email to Turnitin Korea below, and we will support you in unlocking it.
