*AI Outline Generator

1-1. AI Key Takeaways

The screenshot displays the EndNote 2025 interface. On the left, a list of 25 references is shown, with the entry 'Finnegan, N.; Lima, M. G.... 2025 Mitochondrial DNA for P...' selected. The main panel on the right shows the full text of this article, 'Mitochondrial DNA for Phylogeny.pdf'. A red box highlights the AI icon (a star with a plus sign) in the top right corner of the PDF panel. A sidebar on the right side of the PDF panel, titled 'Key takeaway', contains AI-generated summaries of the article's content.

Key takeaway

Phylogenetic inference using sets of mtGenes usually but not always produced phylogenies with greater congruence with the entire mitochondrial genome, indicating single mtGene derived phylogenies may not be reliable.

Additional topics discussed in the document are: Phylogenetic reconstruction methods, Mitochondrial DNA analysis, Congruence metrics in evolutionary biology

Abstract

The ability to use tools has been suggested to indicate advanced physical cognition in animals. Here we show that rooks, a member of the corvid family that do not appear to use tools in the wild are capable of insightful problem solving related to sophisticated tool use, including spontaneously modifying and using a variety of tools, shaping hooks out of wire, and using a series of tools in a sequence t...

3. Cite from a PDF

The screenshot displays the EndNote 2025 interface. The top window, titled 'Deer, 2023 #234 (My EndNote Library.enl)', shows a PDF document 'Deer-2023-Birds of a Feather Redux_ Defining W.pdf'. A text selection in the PDF is highlighted in blue, and a red box highlights the 'Insert' icon in the PDF toolbar. A tooltip indicates: 'Inserts the selected text as a quote followed by a citation'. The bottom window shows the 'References' tab with the following text inserted into the document:

"Neuromodulation is an evolving area of pain management that utilizes modern technology, including hardware platforms innovated by software that allows for the delivery of "electroceuticals" to the nervous system. It can be defined as the dosing of electrical current by implanted leads to treat pain as well as neurological dysfunction." [1]

Below the text, the 'Reference List:' is shown with the following entry:

1. Deer, T., et al., *Birds of a Feather Redux: Defining Ways to Stimulate the Peripheral Nervous System*. J Pain Res, 2023. **16**: p. 1219-1224.
